at Stop 67, C. P. & E. Electric Line
Telephone, Mentor 39-K

READ CAREFULLY

All of the stock offered is grown on our grounds, that grown from cuttings and divisions we know to be clean and true. Plants grown from seeds are from seed stocks obtained from the most reliable sources. Seeds, however, don't always come true to color of some kinds of plants.

OUR PLANTS ARE ALL FIELD GROWN, ARE GIVEN CONSTANT CARE AND CULTIVATION AND WHEN SENT OUT ARE STRONG AND WELL DEVELOPED, MUCH LARGER AND WORTH A GREAT DEAL MORE MONEY THAN POT-GROWN PLANTS.

We do not divide our plants before shipping but send the entire plant as dug. Dividing is only done in rare cases and only then because it is necessary to get the best results.

If, after receiving, you are not satisfied with the quality of the stock, let us know and we will replace anything you mention without charge or without question.

TERMS OF PAYMENT

Our terms of payment are cash on delivery, which does not mean that we ship C. O. D. We deliver the goods and mail bills at the same time, and expect payment within a few days. People unknown to us will please send cash or references with their order. It is impossible for us to make immediate shipment to new clients who do not send references or cheque with their order. Not sending references or enclosing cheque causes delay in the forwarding of the stock you order.

GUARANTEES

We guarantee all stock furnished by us to be first-class, true to name, and larger than pot-grown plants, all of a size so as to give immediate results.

However, there are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and are beyond our control.

QUANTITIES ORDERED

We do not sell less than three plants of a kind unless offered otherwise; twenty-five plants are sold at hundred rate. Five hundred at thousand rate.

RISK

All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

SHIPPING DIRECTIONS

Please give explicit shipping directions, stating whether stock is to be shipped by freight or express, and by what route.

Small shipments can be sent by parcel post. All such shipments will be sent insured, insurance and postage to be paid by the customer.

25 plants of a kind sold at 100 rate; 6 plants of a kind at dozen rate. Not less than 3 plants of a kind sold except where noted.

The Vogue of Old-Fashioned Hardy Flowers

ODAY, more than ever before, lovers of flowers everywhere, are seeking for their gardens the better forms of those Old-Fashioned Flowers of Grandmother's Days, many of which are indigenous to our soils, while other new and rare types continue to appear from various sources, both here and from foreign countries.

Maintaining our position as leading American growers of Hardy Herbaceous, Alpine and Rock Plants, we here present our 1925 Catalogue of what we believe to be the greatest and most representative collection of these classes ever produced by one single American concern.

Without arrogating to ourselves the credit of having originated many of these Perennial Garden Favorites, we pride ourselves in the magnificent quality and variety of our stock, the exceptional beauty and rareness of many, of which we are exclusive producers in this country, and lastly in the magnitude of our industry (the largest in this country), amply reflected in our 1924 returns, whereby close to four million plants left our grounds for points all over the U. S. A. and Canada.

With such achievements behind us, we look forward to, and are splendidly prepared to meet even a greater demand in 1925 for our justly famous Wayside Gardens "Quality" Perennials.

(We will gladly give prospective customers references and information about our stocks and growing methods; we can also furnish names of leading American landscape architects who use our plants.)

ACONITUM FISCHERI

The LOVELY AETHIONEMA

ALYSSUM SAXATILE

All plants are forwarded on receipt of order unless instructed to the contrary, and are sent by Express, purchaser paying charges. We can forward plants by Parcel Post, and if wanted sent in this way add 10 per cent to value of order for postage to points east of the Mississippi River, and 20 per cent to points west of the Mississippi River. Six plants of a kind at dozen rate. 25 of a kind sold at 100 rate; 500 at 1,000 rate. Not less than 3 of a kind sold unless offered otherwise.

	Doz.	100	1000
ACHILLEA (Milfoil, or Yarrow). Plants suitable for dry, sunny places. The dwarf kinds are useful for carpeting or for rockeries, the taller varieties as border plants.			
Eupatorium (syn. Filipendulina). 3 to 4 feet. Flat heads of brilliant yellow flowers; finely cut foliage. Blooms all summer.....	\$1.25	\$8.00	\$70
Millefolium roseum (Rosy Milfoil). July to October. Rosy pink flowers in dense heads, on stems 18 inches high. Effective on edge of shrubbery or in border.....	1.50	10.00	90
Perry's White . 1 to 2 feet. June to September. A choice new variety; pure white flowers over one inch across; broad, overlapping petals. Nothing better for cutting.....	1.50	10.00	90
Parmica, The Pearl . Pure white, double flowers all summer. Prized for cutting	1.50	10.00	80
Boule de Neige . New. An improvement on "The Pearl," with fuller and more perfect flowers. Best for borders.....	1.50	10.00	80
Tomentosa . 6 to 8 inches. July to September. Bright yellow flowers. Excellent for rockeries.....	1.50	10.00	90
ACONITUM (Monkshood). Summer and late autumn-flowering plants with bold spikes of hood-shaped flowers, thriving in either sun or shade. The roots are poisonous and should not be planted where the tubers might be mistaken for vegetables. Delivery from October 15 to March 15. Tubers cannot freeze.			
Fischeri . A dwarf variety with pale blue flowers. 18 in. September..	\$2.00	\$15.00	\$125
Napellus (True Monkshood). 3 to 4 feet. July to August. Large dark blue flowers in a raceme....	4.50	35.00	
—alba . 2 to 4 feet. July to August. An effective plant. White flowered form of Napellus.....	4.50	35.00	
—bicolor . 2 to 2½ feet. July to August. This variety has variegated blue and white flowers, effective	4.50	35.00	
Wilsoni . 5 to 6 feet. September. A recent introduction from Northern China; strong, stately habit with light violet-blue flowers.....	9.00	75.00	
ACORUS (Sweet Flag).			
Acorus Calamus . 2 feet. June-July. Leaves sword shape, erect, flowers inconspicuous. Root stock pungent, aromatic. Thrives best in moist soil, and may be grown in shallow water or dry land.....	1.75	12.00	100
ACTAEA (Braneberry).			
Actaea alba . 2½ feet. A very much improved form, having long spikes of clear white flowers. Good for cutting; effective border plant.....	2.50	15.00	125
rubra	2.50	15.00	125
AETHIONEMA (Persian Candytuft). Strong twiggy bushes, covered with long slender spikes of rosy-pink flowers. One of our best rock plants. 9 in.....	2.00	15.00	125

	Doz.	100	1000
AGROSTEMMA (Rose Campion). Stout, erect-growing plants with silvery foliage, which contrasts well with the showy flowers, which are produced during June and July.			
Coronaria. (Mullein Pink.) Bright rosy crimson. 2½ to 3 feet....	\$1.25	\$8.00	\$60
Walkerii. Large heads of deep rosy red flowers	1.50	10.00	75
AJUGA (Bugleweed). A useful plant for the rockery and for carpeting the ground, particularly in shady positions, as under trees where grass will not grow; flowers in May and June.			
Genevensis. Grows 6 to 8 inches high dense spikes of blue flowers.	2.50	18.00	
Reptans rubra. Grows 3 to 4 inches high, with deep purplish-blue flowers	2.00	15.00	140
ALYSSUM (Rock Madwort). Very popular for beds, borders and winter flowering, of easiest culture and very free blooming. Seed may be sown very early in the spring and up to June 15th, also in the fall for early spring blooming.			
Saxatile compactum. Broad masses of bright yellow flowers in early spring. An excellent plant for the rockery or front of borders. 1 ft.	1.25	8.00	60
Wiersbiechii. Dense masses of canary yellow flowers. Splendid rock or edging plant. 9 in.	2.00	15.00	125
AMSONIA. Salicifolia. 1½ to 2½ ft. Late May and early June. Shrubby habit; holds its leaves late. Light blue flowers with white throat...	2.50	15.00	
Tabernaemontana. 2 to 3 feet. Late May and early June. Small and numerous flowers of light blue in panicles. Smooth foliage resembling the olive. For the hardy border or planted among shrubbery..	3.00	20.00	
ANCHUSA (Alkanet). For producing a mass effect of brilliant blue, the Anchusas cannot be surpassed. Dropmore, the darkest one, is most effective. Opal has larger flowers and is the best of the tall varieties, producing a solid sheet of soft turquoise blue. They should be treated as biennials, as the old plants exhaust themselves at the end of two or three years. They reproduce themselves, however, from self-sown seed. The blooming season can be extended for several weeks by cutting the spikes as soon as the flowers fade, thus preventing seeding.			
Dropmore. Tall spikes of beautiful blue flowers, flowering all summer. Rough, broad foliage. 4 to 5 ft..	1.75	12.00	100
Opal. Very beautiful variety, with large pale blue flowers. 3 to 4 ft.	1.75	12.00	100
Myosotidiflora. A distinct, dwarf perennial variety from Russia, with clusters of charming blue flowers resembling forget-me-nots. An effective rock-plant for shady places. 1 foot.....	3.50	25.00	
Fride of Dover. New, the finest deep rich blue of all. 3 to 5 ft..... (Delivery fall, 1925.)			

ANEMONE JAPONICA (Japanese Anemone).

Valuable plants suitable for massing or single specimens. They grow rapidly and are profuse in bloom, gaining strength and beauty each year. The blooming period extends from August till mid-November, the large open flowers furnishing abundant cut flowers and a brilliant field display. Cover plants in winter. We offer strong field-grown roots only.

	Doz.	100	1000
Alba. Purest white, with yellow center. 2 to 3 feet.....	\$1.75	\$12.00	\$100
Alice. Large flowers of rosy carmine..... (Delivery fall, 1925.)

Max Vogel			
Prince Henry Double rich pink of excellent form			
Richard Ahrends			
rubra. Beautiful rosy-red; stamens bright yellow		\$3.50	\$25.00 \$200
Queen Charlotte. Abundant semi- double flowers broad and perfectly formed "La France" pink. 2 to 3 feet		2.00	15.00 125
Whirlwind. Excellent double white flowers. 2 to 3 feet.....		2.00	15.00 125

ANEMONE Hupehensis.

Was originally introduced from central China, is closely allied to *Anemone japonica* which in a miniature form it resembles. The plant grows from 10 to 12 inches high and from early in August until late in autumn, produces an abundance of flowers about 1½ inches in diameter, of a pleasing mauve-rose

3.00 20.00 175

Pulsatilla (Pasque Flower). Grows from 9 to 12 inches high and produces violet or purple flowers during April and May. An interesting plant for the rockery or well-drained border

2.50 15.00 125

Pulsatilla rubra. Of dwarf habit with reddish purple flowers.....

2.50 15.00 125

Sylvestris. Fine for cool, moist corner of rock garden or border. Large white blossoms on nodding stems of about 12 inches. Very free blooming. May and June...

2.50 15.00 125

ANTHEMIS (Marguerite). **Tinctoria.**

Handsome, finely cut foliage, and large, golden yellow flowers produced all summer. Succeeds in the poorest soil

1.25 8.00 70

Montana. Pale yellow flowers, excellent for cutting. 2 feet. June to October

2.50 15.00 125

ARABIS (Rock Cress). **Alpina.** Pure

white flowers produced in dense masses, splendid for border and rockery work, and last quite some time when cut

1.50 10.00 90

ARENARIA (Sandwort). **Montana.** A

hardy perennial growing in close tufts, profusely covered with small silvery white flowers which appear quite early in the season. Excellent as an edging plant in formal gardens. Suitable for rockeries in sunny places. Flowers resemble small white upturned morning glories....

1.75 12.00 100

Grandiflora. From the Pyrenees mountains. Covers itself with its pure, snow-white flowers. One of the best of all rock plants. May.

1.75 12.00 100

ASCLEPIAS (Butterfly Weed).

Tuberosa. Attractive native plants, flowering during July and August, and growing about 2½ feet high. Umbels of bright orange-colored flowers

1.50 10.00 80

ASPERULA (Woodruff).

Odorata. 6 to 8 inches high. May. Habit erect; leaves usually in a whorl of eight, finely toothed. Increases rapidly and is used for carpeting shady places and for edgings. Heads of snowy white flowers. A fine-scented herb.....

3.50 25.00

ASPHODELUS (King's Spear).

Luteus. Tall spikes of bright yellow, lily-like flowers, very fragrant; swordlike foliage; fine for borders

1.75 12.00 100

AQUILEGIA (Columbine).

As a cut flower the Long Spurred Aquilegias are the daintiest of our outdoor grown flowers.

They come in blues, whites and yellows, and shades of pink and rose in strains reasonably true.

Practically all the various shades and colors are in the *Coerulea* Hybrids. They remain in bloom for a long season and are vigorous and long-lived.

They are not at all particular as to soil or location, although they prefer a sandy loam and a moist but well drained, sunny position, and usually make themselves at home in any hardy border or rockery. Their period of flowering covers the late spring and early summer months. Taken as a whole, they are a most important part of the hardy garden, and should be grown in quantity by every lover of old-fashioned garden flowers.

ASTER, ELTA

ASTER, NOVI-BELGI CLIMAX

ASTER, NOVI ANGLIAE

HARDY ASTERS (Michaelmas Daisies). The many species, widely distinct from each other in habit and form, are, with a few exceptions, all native of North America. It is in Europe, however, that our Asters have been most highly appreciated. Many improvements have been made by European growers, and many hybrid forms have been produced by crossing the different species.

Culture. All are of the same easy cultivation, succeeding in almost any soil or situation. *Amellus*, *Ericoides*, and *Novae-Angliae* do best in open, sunny, dry situations, while *Novi-Belgi* may be grown in partial shade in most situations.

For the best results, they require division and re-planting every third year.

ASTER (Michaelmas Daisy).

Anita Ballard. Large cornflower-blue flowers, distinct, incurved petals. 4½ feet

Artis. Double flowers of a clear petunia-violet

Blue Gem. Double flowers of rich blue

Big Bear. *Ericoides* type; rich violet with orange center

Charm. Very double violet-blue flowers

Erica. A beautiful clear pink; large double flowers

Elta (New). Double flowers of pale lilac. Very handsome shade.....

Grey Lady. Exquisite shade of opal, with large semi-double flowers. Extra fine

Heather Glow. Extra large flowers, freely produced, of a delightful rose pink shade. 4½ feet.....

Joan Vaughan. Large semi-double flowers of deepest blue.....

Nancy Ballard. Deep purplish mauve flowers, semi-double in form; flower heads are branched, completely covered with masses of bloom

Mauve Queen. Very large semi-double flowers of clear mauve. 4 feet

Maid of Colwell. Pure white, the finest of all whites. Long loose spikes of huge flowers

Lady Lloyd. A very fine clear rose-pink. Lasts exceedingly well. 3 feet

Peggy Ballard. Large pyramidal sprays of double rosy-mauve flowers. 3 feet

Purple Emperor. Early dwarf variety with large semi-double flower of rich purple. 2 feet.....

Queen of Colwell (New). One of the finest of late introductions; large stout branching stems, covered with pale mauve blooms. Tall...

Robinson V. C. A pretty bluish-mauve, double flowers borne in long sprays

Snowdrift. Branching pyramidal heads of semi-double snow-white flowers. One of the best.....

Thompsonii. Large pale blue flowers borne in huge spikes. Very fine

NEW JAPANESE HARDY ASTER.

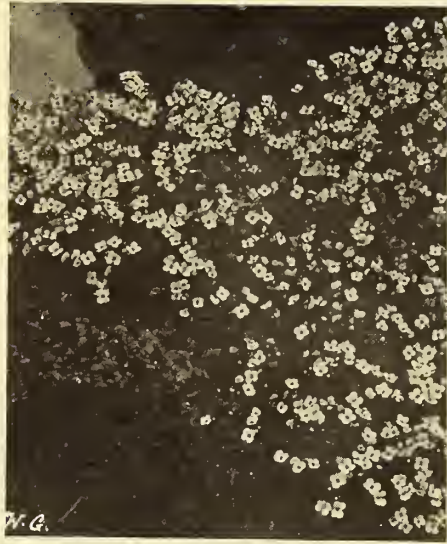

Mauve Cushion. Distinct species which has attracted much attention by its unique habit of growth, its floriferousness and lateness in flowering. It forms a circular cushion-like plant 2½ feet across, the center of the plant rarely exceeding 9 inches in height, gradually tapering to 3 or 4 inches at the outside; the flowers, of delicate mauve, with silvery white reflection, measure over 1¼ inches in diameter, and are produced in such lavish profusion as to completely cover the plant; the blooms are at their best in November

This list of new asters will be offered for sale in fall of 1925. Order now. Dozen \$2.00; 100 \$15.00; 1,000 \$140.00.

ROTUNDIFOLIA

CAMPANULA CARPATICA

CAMP. DEL.
PERSICI-
FOLIA

CAMP. LATIFOLIA

BOCCONIA (Plume Poppy).

Cordata. A noble hardy perennial, beautiful in foliage and flower, and adapted for planting in the shrubby borders, center of beds, and in bold groups in any position. It will grow in any soil or situation, attaining 6 to 8 feet in height. Flowers creamy-white in terminal panicles during July and August.

Doz. 100 1000

\$1.50 \$10.00 \$80

BOLTONIA (False Chamomile). A showy native hardy perennial plant with large, single Aster-like flowers; in bloom during the summer and autumn months, and with its thousands of flowers open at one time produces a very showy effect.

Latisquama. Pink, slightly tinged with lavender. 4 to 6 feet.

1.40 9.00 70

BUDDLEIA (Butterfly Bush).

Variabilis Magnifica. This is really a shrub, but the top usually freezes back, and new growth starts from the root like other perennials. Plants grow three to four feet and are covered with long racemes of lilac-like flowers in July. The best location is in good, rich, well-drained soil in a sunny situation. It attracts the butterflies, and as many as fifty have been counted about a plant in a single afternoon.

Each, 35c. 4.00 30.00

BUPHTHALMIUM (Ox-eye).

Salicifolium. Bears large, rich, golden yellow flowers through the summer. 2 feet.

2.00 15.00

CALLA Elliottiana. A grand rich golden yellow variety of the Arum Lily. (For spring delivery only.)

3.00 20.00 175

CALLIRHOE. Involucrata. An elegant trailing plant, with finely divided foliage and large saucer-shaped flowers of bright rosy crimson, with white centers, which are produced all summer and fall.

1.50 10.00 90

CAMPANULA (Bell flower).

Indispensable hardy garden flowers, of much variety of form, some being of tall and imposing habit, while others are dwarf compact little plants, suitable for edging, rockwork, etc. They like a good rich soil, and last much longer in bloom if planted in a half-shady place. All of the taller growing kinds should be staked to prevent injury from high winds.

Doz. 100 1000

Alliariaefolia. A grand border plant with tall spikes of long pendent bells. 3 feet.

\$3.00 \$20.00

Bononiensis. Small blue flowers borne profusely on slender stems. June. 2½ feet.

3.00 20.00

Carpatica (Carpathian Harebell). A pretty species growing in compact tufts, not exceeding 8 inches high; flowers clear blue, held erect on wiry stems. It begins blooming in June, continuing until October. As an edging for a hardy border or for the rockery it is unsurpassed.

1.50 10.00 80

Carpatica alba. A pure white form of the preceding.

1.50 10.00 80

Elegans. Fine Campanula for borders and rockeries. Height 18 inches. Blooms all summer.

2.00 12.00 100

Glomerata. A favorite old-fashioned herbaceous plant producing deep blue flowers in large close heads. Height 18 inches.

2.00 12.00 100

Grandis (Great Bellflower). 1½ feet. May and June. Very showy, large, saucer-shaped flowers, rich violet-blue.

2.00 15.00

—**alba.** A white form of the above.

CHRYSANTHEMUM MAXIMUM (Shasta Daisy).

The improved varieties of Marguerite all allied to the Ox-eye Daisy that adorns our fields in the spring, are among the most useful of our garden flowers. Not only have these flowers been greatly improved in size and form, but there are now early and late blooming varieties which give a succession of long stemmed flowers so valuable for vase decoration during four months of the year. Glory of Wayside is a variety worthy of attention, and Etoile d'Or is robust and free-flowering. Mrs. C. Lowthian Bell has enormous flowers with strong stems. The Shasta Daisy has a small yellow center with long white petals, the slender stems springing from the base of the plant, and is most attractive either in the perennial border or as a cut flower.

FOR MAY FLOWERING

Doz. 100 1000

Leucanthemum flore pleno. (Double White Shasta Daisy). Flowers double pure white of medium size, excellent for cutting; each plant produces from 30 to 50 flowers; perfectly hardy without any protection. Our latest and best addition to the Shasta Daisies..... \$1.50 \$10.00 \$90

CHRYSANTHEMUMS.

Hardy Chrysanthemums are undoubtedly one of the best of border plants, coming in with a grand display of color and cut flowers when other plants are on the wane. In our estimation one cannot plant too many. From September until frost one can literally gather armfuls from a seemingly inexhaustible supply.

HARDY OLD-FASHIONED VARIETIES.

In separate colors.

FULL FIELD-GROWN CLUMPS—NOT DIVISIONS

We collected from old gardens some of the old-fashioned Chrysanthemums which are really hardy and which bloom in October and November, after all other outdoor flowers are gone. Often in bloom when the snow is on the ground; are very showy. 3 to 4 feet high. When in bloom are a perfect mass of flowers.

	Doz.	100	1000
Old-fashioned Hardy Pink	\$1.50	\$10.00	\$80
Old-fashioned Hardy Red	1.50	10.00	80
Old-fashioned Hardy White	2.00	15.00	125
Old-fashioned Hardy Yellow	2.00	15.00	125

NAMED VARIETIES.

The varieties offered below comprise the choicest new hardy outdoor sorts, that need but a light covering to carry them through the winter. We have chosen the earliest to bloom, so that the full enjoyment of these best-of-all autumn flowers may be derived by those in northern territories where winter comes early.

Best results are obtained from pot grown plants, but we offer both from pots and field as follows:

Those marked (*) thus, can be supplied in field-grown clumps. Price	Doz.	100	1000

CYPRIPEDIUM (Lady's Slipper).

Hardy orchids that thrive in a moist peaty soil, in shade or partial shade; flowers are very interesting with their odd shapes and uncommon colors and markings

Doz. 100 1000

Acaule (Lady Slipper; Moccasin Flower).

This is often called the Red Lady Slipper, but the flower is rose-purple in color. The plant sends up two broadish green leaves from the base, and from between them comes a stalk about a foot high bearing a single large, showy flower. Plant in a well drained soil, with some leaf-mold. This does quite well in pots.....

\$2.50 \$15.00 \$125

Pubescens (Large Yellow Lady Slipper).

Very much like Parviflorum, only the flowers are larger. This should be planted in a rich bed in which leaf-mold should be a part, in some moist, yet well drained shady spot. It should grow stronger for several years if left undisturbed

2.50 15.00 125

Spectabile (Showy Lady Slipper).

The finest and most showy of all our orchids. It grows about two feet high, bearing along the stalk several rather large, roundish leaves, and on top one or two quite large rose-purple or nearly white flowers. Does exceedingly well in a moist and partly shaded bed of peat or leaf-mold. It is also a good pot plant for the cool greenhouse

2.50 15.00 125

DAPHNE (See Shrubs, page 46).

DELPHINIUMS (Larkspur).

English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. Some varieties grow 8 feet high in rich soil. They have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is long; in fact they will bloom from spring till fall.

The culture of Delphiniums is exceedingly simple. They thrive in almost any position, and may be planted at any time of the year, provided that in summer the plants are not too forward, and that they be well watered if the weather is dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured, will give excellent results. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphinium is exceedingly fine. A succession of flowers may be expected from spring to early autumn, especially if the spikes which have done flowering early be cut down to the ground; fresh growth will then be produced which will give blossoms. Watering in summer will increase size of spike and flower. Top-dressing is greatly recommended on certain soils, instead of the bare surface of the ground being left exposed to the sun. Some of the neater dwarf Alpine and other hardy plants may be utilized to plant between and around Delphiniums. Coal ashes strewn over the crowns will protect the plants from slugs through the winter and spring. Any garden soil suits the Delphiniums.

DIELYTRA, OR DICENTRA (Bleeding Heart).

A hardy perennial with heart-shaped, rose-colored flowers in drooping spikes. The base of the flower is furnished with two sheath-like spurs. One of the best border plants; perfectly hardy and easily cultivated. Flowers in April or May. The Bleeding Heart is one of the choicest members of the old-fashioned gardens. They prefer the shaded nooks in the border.

	Doz.	100	1000
Spectabilis (Bleeding Heart, or Seal Flower). An old-fashioned favorite; its long racemes of graceful heart-shaped pink flowers are always attractive; it is used largely for forcing, and is perfectly at home in any part of the hardy border, and especially valuable for planting in clumps.....Each 50c,	\$4.50	\$35.00	\$325

Eximia (Plumy Bleeding Heart). A dwarf-growing sort, with beautiful finely cut foliage and showy racemes of pretty pink flowers throughout the season. Too much cannot be said for this fine border plant as it is equally at home in full shade or sun and perfectly hardy anywhere. Bailey's "Encyclopedia of American Horticulture" says in description: "The handsomest foliage of any border plant in the entire collection." This variety of Bleeding Heart is the only kind which will replace the Spectabilis which is so hard to get. Will grow in any climate under any conditions.

2 year old	2.00	15.00	125
1 year old (Strong)	1.75	12.00	100

DIGITALIS (Foxglove). For stately and picturesque beauty it is not to be surpassed, and, planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchards or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial.

Doz. 100 1000

Giant Shirley Foxgloves. We were able to buy the first seed offered by the originator a year ago and now have a fine lot of field grown plants of the Giant Shirley Foxgloves. They are a genuine "Shirley" production of extraordinary size and vigor, growing 6 to 7 feet tall. The flower-heads are over 3 feet long, crowded with big, bell-shaped blossoms. Colors range from white and shell-pink to deepest rose, many attractively dotted with crimson or chocolate. Furthermore, they are more apt to be of perennial habit than the old-fashioned Foxgloves.....

ERYNGIUM (Sea Holly). Finely cut spiny foliage and thistle-like heads of flowers of a beautiful steel blue. Very decorative in the hardy border, and useful for dry bouquets in winter.

Amethystinum (syn. Oliverianum). The true blue Thistle, with amethyst stems and bracts..... 2.50 18.00

Planum. Deep blue cones..... 1.50 10.00 90

EULALIA (See Grasses).

EUPATORIUM (Hardy Ageratum). A splendid native plant, growing 6 to 10 inches high; immense heads of purplish-pink flowers; fine for naturalizing along streams and ponds, and for planting among shrubbery.

Fraseri 1.50 10.00 90

Coelestinum. Lavender flowers. August to frost..... 1.50 10.00 90

EUPHORBIA (Milkwort).

Corollata (Flowering Spurge. Showy and useful native plant growing about 18 inches high, and bearing from June till August umbels of pure white flowers with a small green eye. 1.75 12.00 100

Myrsinites. A pretty prostrate species, bluish foliage, with crowded heads of yellow flowers. 2.00 15.00 125

FERNS (Hardy Varieties).

The cultivation of Hardy Ferns is remarkably simple. All they want is a light alluvial soil, a little loam and peat or leaf-mould sufficient to keep the soil light and open, plenty of moisture, positions varying from partial to deep shade; some will grow in water, such as *Lastrea*, which revels in 2 to 3 inches of water, while many others thrive luxuriantly on the margins of lakes and streams in full sun. The *Aspleniums* and many others will grow on walls, chinks of rock, etc. Many will revel in full sunshine in any ordinary border. There is scarcely a garden or even a back yard where Ferns cannot be grown more or less successfully, as a hobby a most interesting and fascinating one. Anyone commencing with a few specimens will soon be induced to go on collecting until he has made a feature both interesting to himself, and also to all who see them.

Adiantum Pedatum (Hardy Maiden-hair). Most attractive of our native ferns; black stems with delicate green fronds.....

Aspidium Acrostichoides (Wood Fern) (*Polystichum*). An evergreen species with deep green, divided fronds. Should be planted in a shady position. 12 inches.

spinulosum (*Dryopteris spinulosa*). *Spinulosa* Woodfern. An evergreen variety that requires rich, well-drained soil. 18 to 24 inches.

Asplenium Felix Femina (Lady Fern). Grows in shade or sun. Large and handsome. 3 feet.

Dicksonia punctilobula (*Dennstaedtia punctilobula*). Hay-scented or Gossamer Fern. Grows well in either sun or shade. 18 to 24 ins. Very erect with broad fronds, of a soft wooly texture.

Lastrea Chrysoloba (Buckler Fern). Dark green fronds, with irregularly but thickly placed pinnules. 18 inches.

Onoclea sensibilis (Sensitive Fern). Requires wet places either in sun or shade. 12 inches.

Struthiopteris Germanica (The Ostrich Fern). A very graceful species with finely cut pinnules, growing 2 to 3 feet high.

Csmunda Claytoniana (*Interrupta*). A distinct and very beautiful native species; foliage velvety green, with prominent brown spores in middle of fronds.....Each 30c.

Cinnamonea (Cinnamon Fern). Erect fronds, drooping at tips, with bright cinnamon colored spores at end of fronds; a very conspicuous variety...Each 30c.

Regalis (The Royal Fern). Wonderful in damp marshy places, where its rich yellowish green foliage and golden stems make very striking subjects. Each 30c.

Woodsia Obtusa. Large rosettes of curious hoary foliage. Fronds 1 foot in length; very free-growing.

Doz. 100 1000

Price, any of the above varieties.. \$2.00 \$15.00 \$125
(Except where noted.)

HELIANTHUS

FEVERFEW (*Matricaria*). **Little Gem.**

A most useful border plant and valuable summer cut flower, with large double white flowers. June until October. 18 to 24 inches.

	Doz.	100	1000
October.	\$1.00	\$7.00	\$60
Golden Ball. Dwarf yellow.	1.00	7.00	60

FOXGLOVE (See *Digitalis*).

FUNKIA (*Plantain Lily*). The Plantain Lilies are among the easiest plants to manage; their broad, massive foliage makes them attractive subjects for the border even when not in flower. They succeed equally well in sun or shade.

Aurea variegata. Golden variegated-leaved

2.00 15.00 125

Coerulea. Broad green leaves; blue flowers in June.

2.00 15.00 125

Glaucia. A very pretty Japanese species, with distinctive bluish foliage

5.00 40.00

Subcordata grandiflora. Very large pure white lily-shaped fragrant flowers in August and September.

3.00 20.00 180

Variegata. Variegated foliage; blue flowers. Beautiful edging plant..

2.00 15.00 125

GAILLARDIA (*Blanket Flower*).

Improved English strain. We consider the Gaillardia one of the most desirable hardy plants in cultivation, and our strain of these brilliant flowered plants to be the finest extant. Though such an ornamental addition to the herbaceous border, the perennial Gaillardia is content with extremely simple treatment. Dig the soil deeply and enrich with well-rotted manure. We recommend the Gaillardia for bedding purposes as well as for borders. Everyone will have noticed how grandly Gaillardias have thriven through droughts; they seem hardly to need water. The gay blossoms are obtainable in perpetual profusion from June to November and the greater the drought and scarcity of other flowers the more the utility of the perennial Gaillardia is demonstrated. No more beautiful and brilliant sight can be imagined than a large bed of Gaillardias, with their profusion of highly colored flowers of all shades. Some of the varieties of our improved strain measure fully 5 inches in diameter.

	Doz.	100	1000
Mixed Colors	\$1.25	\$8.00	\$70

GENTIANA (*Blue Gentian*). **Andrews.**

One of the most fascinating native plants. The flowers, which are tightly closed, are borne at the top of a stem from 6 to 8 inches long, and are an intense deep blue. Blooms best in moist places. July and October

2.00 15.00 125

GERANIUM (*Crane's Bill*). **Ibericum.**

Handsome serrated foliage. Large lilac-blue flowers, blooming all summer; compact bushy plants. 18 in.

1.50 10.00 90

GEUM (*Avens*). **Coccineum Mrs.**

Bradshaw (*Chiloense*). A splendid new variety, with large double flowers of a fiery red, blooming nearly all summer. Peculiarly attractive. 18 inches

1.50 10.00 90

Lady Stratheden. A new introduction of great merit. Rich golden yellow blossoms, counterpart of G. "Mrs. Bradshaw." Fine for hardy garden

	Doz.	100	1000
GILLENIA (Bowman's Root).			
Trifoliata. A strong growing plant; admirable for the border or for use in connection with shrubs, with handsome trifoliate foliage and numerous white flowers tinged with pink. 3 feet	\$1.75	\$12.00	\$100

GRASSES (Hardy Ornamental).

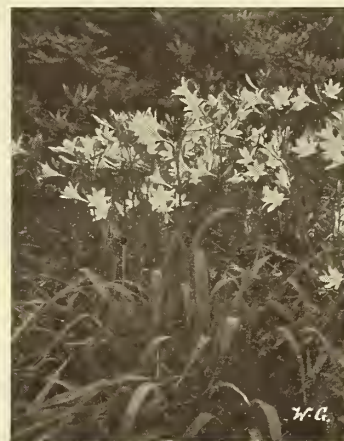

The ornamental grasses can be used with telling effect in borders, large beds, or by the margin of ponds and lakes. They are often used with small shrubs and medium sized trees in wide borders. The *Eulalias* planted singly on lawns where the soil is deep and rich, take care of themselves and grow rapidly into large specimens. In large, round beds, with ornamental grasses as the principal feature, the effect is heightened by the addition of such plants as *Cannas* or dwarfier flowering plants near the margin.

	Doz.	100	1000
Elymus glaucus (Blue Lime Grass). Handsome grass with narrow glaucous silvery foliage. Well adapted for the border or edge of beds with taller sorts.....	\$1.50	\$10.00	\$90
Erianthus ravennae (Plume Grass or Hardy Pampas). 10 to 12 feet high, frequently throwing up 30 to 50 flower spikes. Closely resembles Pampas Grass.....	3.00	20.00	175
Eulalia gracillima univittata (Japan Rush). Graceful habit, with very narrow foliage; of a bright green color, with a silvery midrib. 6 to 7 feet	1.50	10.00	90
Eulalia japonica. Long, narrow, graceful green foliage, and when in flower the attractive plumes are 6 to 7 feet high.....	2.00	15.00	125
Eulalia japonica variegata. Very ornamental; long, narrow leaves, striped green, white, and often pink or yellow.....	2.00	15.00	125
Festuca glauca (Blue Fescue Grass). 12 to 15 inches. Ornamental grass. Grown for dense tufts of very narrow bluish leaves. Used for edgings or for contrast with darker foliage. Desirable for rock garden	1.50	10.00	90
Pennisetum Japonicum (Fountain Grass). A beautiful grass whose flower heads are produced in the greatest profusion. Color rich mahogany, conspicuously tipped with white	2.50	15.00	125
Phalaris Arundinacea variegata (Variegated Ribbon Grass). Leaves longitudinally striped with white; very ornamental; sometimes run wild about old places. 18 inches	1.50	10.00	90
GYPSOPHILA (Baby's Breath). Very branching or spreading slender plants, with scant foliage when in bloom. Of easiest culture in open, rather dry places. Desirable where a mass of delicate misty bloom will fill in a bare place.			
Paniculata compacta. When in bloom in August and September it forms a symmetrical mass 2 to 3 feet in height and as much through, of minute white flowers having a beautiful gauze-like appearance	1.25	7.00	60
Rokejeka (Acutifolia). Rose-colored "Baby's Breath." Tall graceful grower, and a wonderful cut flower	1.50	10.00	80

HELENIUM

HELIANTHEMUM

HEMEROCALLIS

HELIOPSIS

DOUBLE HOLLYHOCK (p. 22)

HIBISCUS, CRIMSON-EYE

HEUCHERA BRIZOIDES

GYPSOPHILA—Continued.

Doz. 100 1000

Repens. A beautiful trailing plant for the rockery, with clouds of small white and pink flowers in July and August..... \$1.50 \$10.00 \$90

Paniculata flore pleno. A light and graceful cut flower, compatible with all others, no matter of what shape or color; masses of minute double white flowers. (Plants offered are raised from seed which comes about 25 per cent true. We offer it as such and do not guarantee all plants sold to be double.) 1.50 10.00 90

HELENIUM (Sneezewort). Tall growing plants closely allied to the Sunflower; bearing in late summer and fall great masses of large daisy-like flowers in shades of yellow and orange.

Autumnale superbum. Broad heads of deep golden-yellow flowers in late summer. Grows 5 to 6 feet high 1.75 12.00 100

Autumnale rubrum. A splendid new variety; deep oxblood red, changing to terra-cotta. 5 to 6 feet. September 2.00 15.00 125

Bigelowi. Quick-growing, branching plants, 2 to 3 feet; quite showy during August with terminal clusters 1½ inch, deep yellow flowers; brown centered 2.00 15.00 125

Julisone. Brilliant golden yellow, with brownish center; new and very distinct. (For fall delivery 1925) 3.50 25.00

Pumilum Magnificum. Large golden yellow flowers; one of the most floriferous and useful border plants in cultivation. (For fall delivery 1925) 3.50 25.00

Pumilum Aurantiacum (New). Large, bright yellow flowers, possibly better than the preceding. (For fall delivery 1925)..... 3.50 25.00

Riverton Beauty. Pure lemon yellow, with large disc of purplish-black 2.00 15.00 125

Riverton Gem (New). Old gold, suffused with bright terra-cotta, changing to wallflower-red. August to October..... 2.00 15.00 125

Wyndley. A grand bushy variety, with large spreading heads of golden yellow flowers, shot and stained with reddish-mahogany. 3 feet. (For fall delivery 1925.) 3.50 25.00

HELIANTHUS (Hardy Sunflower).

The perennial Sunflowers should always be planted in masses, where they may have plenty of room, against a background of shrubbery, or naturalized in wild gardens or woodlands. They produce a grand effect impossible to describe. In combination with hardy Asters, where broad color effects are wanted in late summer, they have few equals. They are profuse bloomers, producing an unlimited supply of flowers for decoration.

Miss Mellish. An improved variety of *Helianthus lactiflorus*; of taller growth and having larger flowers. A decided improvement and most beautiful sort 1.50 10.00 90

Maximiliani. The latest of all. Golden yellow flowers in graceful sprays in October. Fine for cutting. 6 feet..... 1.50 10.00 90

Multiflorus fl. pl. Clear yellow; closely resembling a *Dahlia* in shape and finish. 4 feet..... 1.50 10.00 90

HELIANTHUS—Continued.

Questifolius. An extremely beautiful October variety, with large flowers of a delightful shade of golden yellow \$1.50 \$10.00 \$90

Sparcifolius. The best of the summer-blooming varieties of hardy Sunflowers. Flowers 3 inches in diameter and freely produced. Plant grows 3 to 4 feet high, and spreads rapidly. Fine for the border, and for planting among shrubs 1.50 10.00 90

HELIANTHEMUM (Rock or Sun Rose). Low growing evergreen plants, forming broad clumps, and which during their flowering season, July to September, are hidden by a mass of bloom; for the front of the border, the rockery, or a dry sunny bank.

Mutabile. Golden yellow..... 1.75 12.00 100

Pink Shades 2.50 15.00

Red Shades 2.50 15.00

White Shades 2.50 15.00

Choice Mixed Varieties..... 1.50 10.00 90

HELIOPSIS (Hardy Zinnia). Similar in general habit to Helianthus, but commencing to flower earlier in the season, July and August. Of dwarfer habit, rarely exceeding 3 feet in height. Very valuable for cutting.

Pitcheriana. A desirable variety. The flowers are of a beautiful deep golden yellow, about two inches in diameter, very thick texture and a useful cut flower..... 1.50 10.00 90

Scabra excelsa. A new variety with very rich chrome yellow flowers, turning to a bright yellow as they mature. These are almost double, having from 4 to 5 rows of petals, and are produced very profusely. The plant is of robust growth, about 3 feet high, and from mid-July to the end of August makes an effective display..... 2.00 15.00 125

HEPATICA (Liver-Leaf).

Triloba Coerulea. A pretty native, spring-flowering plant, with blue flowers; prefers shade, but will do fairly well in an open situation in moist, rich loam. We offer large established clumps, each consisting of about 6 large crowns 1.25 8.00 70

HEMEROCALLIS (Yellow Day

Lily). Lemon Lilies, or Hemerocallis flava, have long been favorites in our garden, and are always included in any list of the most popular hardy plants. All of the varieties of Hemerocallis are desirable and beautiful. The tall, graceful, grass-like foliage is very handsome and sets off the charming, lily-like flowers very effectively. They look particularly well naturalized along streams or on moist banks, and will thrive most luxuriantly in partial shade.

Flava (Lemon Lily). Sweet-scented, clear full yellow 2½ feet. Flowers in June..... 1.50 10.00 95

Fulva (Brown Day Lily). Coppery orange, shaded crimson. 3 feet. July 1.50 10.00 90

Dr. Regel. Handsome, rich orange-yellow flowers in May. Very fragrant. Fine for cutting. 1½ feet. 1.50 10.00 90

HYACINTHUS CANDICANS

IBERIS (CANDYTUFT)

INCARVILLEA

HEMEROCALLIS—Continued.

	Doz.	100	1000
Thunbergi. Much like Flava, but flowers in July, a month later, and 6 to 10 inches of the upper portion of the flower scapes are thickened and flattened	\$1.50	\$10.00	\$90

Florham. A strong grower, 3 to 3½ feet high, large trumpet-shaped flowers; rich, golden yellow, with Indian yellow markings. June and July	2.50	15.00	125
---	------	-------	-----

Kwanso. Large, double-flowered variety, with rich, golden-bronze flowers	2.50	15.00	140
---	------	-------	-----

Middendorfi Major. A very striking variety, with huge rich, orange-yellow flowers	1.50	10.00	90
--	------	-------	----

	Doz.	100	1000
HESPERIS (Sweet Rocket). Matronalis. 2 to 3 feet. June, July. Fragrant purple flowers in showy spikes. Desirable for wild garden, shrubbery or mixed border.....	1.40	9.00	75

HEUCHERA (Alum Root). Beautiful plants for front row of borders, with slender, fairy-like spikes of richly colored flowers; most striking in the garden and light and graceful for cutting.

Americana. 1½ to 2 feet. July. A native plant with greenish-yellow flowers; foliage mottled. Rock garden or edging of border.....	2.00	15.00	125
--	------	-------	-----

Brizoides. We have thoroughly tested this new Heuchera and find it one of the most desirable hardy plants introduced in many years. It has the same foliage and habit as <i>Heuchera sanguinea</i> , but the color is not so brilliant, though five or six times as many flowers are produced. Blooms in May...	3.00	20.00	150
--	------	-------	-----

Sanguinea. 12 to 18 inches. June to September. Flowers bright crimson; very free-flowering. Nice for cutting. Excellent for rock garden.	3.00	20.00	150
---	------	-------	-----

HIBISCUS (Mallow).

Mallow Marvels. A robust type of upright habit, producing an abundance of flowers of enormous size in all the richest shades of crimson, pink and white;

	Doz.	100	1000
Mixed colors. 2 year.....	\$1.50	\$10.00	\$90

Moscheutos (Swamp Rosemallow). Flowers 6 inches in diameter. Red or pink. 2 year.....	1.50	10.00	90
--	------	-------	----

Moscheutos "Crimson Eye." Flowers of immense size; of the purest white, with a large spot of deep velvety-crimson in the center....	1.50	10.00	90
--	------	-------	----

New Giant-flowering Marshmallows. A wonderfully improved form of our greatly admired native Marshmallow or Rosemallow, in which not only the colors have been greatly intensified, but in which flowers of enormous size, frequently 10 to 12 inches in diameter, have been developed. Equally at home in all positions, having the same vigor in dry and wet ground; perfectly hardy and are very floriferous, blooming from early in July until late in September. They are the most beautiful and hardy of all herbaceous plants, their dignified spikes of huge blossoms make them indispensable for large groups and mixed borders. We offer three distinct colors.

Red, Pink or White. Strong three-year-old	1.75	12.00	100
--	------	-------	-----

Red, Pink and White. Strong two-year-old	1.50	10.00	90
---	------	-------	----

Doz. 100 1000

HIERACIUM (Hawkweed). **Aurantiacum.** 6 to 12 inches. June to October. Small clusters of dandelion-like flowers, orange color, on leafless stems; foliage shaggy in tufts near ground

\$1.50 \$10.00 \$90

HOLLYHOCKS (*Althea Rosea*).

The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect, with elegant camellia-like flowers that form perfect rosettes of the most lovely shades of color. They require a deep, rich soil and a sunny corner, but will repay by their gorgeous and lavish bloom all the attention bestowed upon them.

Painters choose Hollyhocks as subjects for floral paintings oftener than any other flower. We suppose the reason for this is that artists have a keener appreciation of beauty than other people, and recognize that the common single Hollyhock is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group of single Hollyhocks, and once planted they will literally take care of themselves even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doubles are beautiful, but inclined to be topheavy. Hollyhocks planted in the fall will bloom the following summer.

Doz. 100 1000

Double. Separate colors, red, maroon, white, yellow, pink, Newport pink, white with purple base, bright rose, dark purple, apple blossom, pale lilac.....	\$1.40	\$9.00	\$75
--	--------	--------	------

New Allegheny. Immense semi-double flowers, with fringed edges.	1.40	9.00	75
--	------	------	----

Single. Red, white, pink and mixed. (Our Hollyhocks are free from disease and rust. Clean, strong, 1 year old stock. 2 year old plants are never sent out, as they are not satisfactory.)	1.40	9.00	75
--	------	------	----

HYACINTHUS CANDICANS. Twenty to thirty white, pendent, bell-shaped flowers on stalks 3 to 4 feet high. Blooms early and till late fall. One of the best of all hardy bulbs for the herbaceous border

1.00 5.00 45

HYPERICUM (St. John's Wort).

Moserianum. A most desirable border plant, of free and graceful habit, producing long, slender, much branched stems, leafy to the base and all drooping towards the ends, apparently from the weight of the flowers and buds, although the flowers face so none of their beauty is lost. It is marvelously free-flowering, of large size, measuring from 2 to 2½ inches in diameter; in color a rich golden yellow, rendered still more effective by the numerous yellow stamens and crimson anthers, and blooms continuously the entire season. 2 feet.....

3.60 20.00 180

Henryi. The same as Moserianum, though slightly more upright in growth and much hardier and better suited for cold climates...	3.00	20.00	180
---	------	-------	-----

IBERIS (Hardy Candytuft). Most desirable dwarf plants, 8 to 10 inches, with evergreen foliage, which is completely hidden with dense heads of flowers early in the spring.

Sempervirens. Very dwarf and covered with a sheet of white, a particularly fine rock plant.

	Doz.	100	1000
1 year old plants.....	\$1.50	\$10.00	\$90
2 year old clumps.....	2.00	15.00	125

Jucunda. Dwarf, cerise-pink flowers in June. Glaucous blue foliage. Splendid rock plant; perfectly hardy. 6 inches.....

	2.00	15.00	125
--	------	-------	-----

INULA (Fleabane). **Golden Beauty.** Doz. 100 1000
Free-flowering border plants with yellow flowers \$1.50 \$10.00 \$90

INCARVILLEA. Large rich rose Begonia-like flowers with deep yellow throats, produced all through the summer. A hardy perennial which succeeds well in borders and is equally valuable for greenhouse decoration. Height 18 inches.

Delavayi. Rose-pink flowers produced in large trusses..... 3.00 20.00

HARDY IRISES

IRISES (German or Flag Irises).

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it. It throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

Plant in late August or early September preferably. Spring will do also.

The roots offered in this list are from plants transplanted a year ago and are of a size large enough to bloom next spring. The collection is up to date and consists of the best and newest standard varieties.

Twenty-five roots at 100 rate, 250 roots of a kind at 1,000 rate. We guarantee the usual Wayside Gardens quality.

The Letter "S" refers to the standard or upright petals; "F" the fall or drooping petals.

CHOICE NEW INTRODUCTIONS

Cecil Minturn (New). Soft Cattleya-rose. A beautiful flower with broad petals, gracefully waved and crinkled; one of the finest Irises for size and extreme beauty.

Each \$5.00.

Lent. A. Williamson. Rated in 1922 by the American Iris Society as the finest Iris in the world. S. Campanula-blue violet; F. rich royal purple with yellow beard. Very tall and distinct. Each \$2.00.

Lord of June. S. lavender blue; F. rich violet-purple. A magnificent variety of gigantic size. Each \$1.50.

Mme. Chobant (Denis 1916). 36 inch. A clover-scented Plicata type. Prussian red with light brownish veins, on a pale chalcadony ground. One of the most beautiful of all Irises Each \$2.00.

Queen Caterina (Sturt). A mid-season variety of a beautiful clear orchid-purple veined with brilliant gold; the whole being further enhanced with a bright orange beard. Each \$2.00.

Shekinah (Sturt). A delightful shade of pale yellow shading to amber in the throat, with a lemon-colored beard. This is a true yellow Pallida, and the first of the type. A most uncommon and very handsome variety.....Each \$2.00.

GENERAL LIST OF IRISES

*These varieties have distinctive points of real merit, and are in our opinion the best of the moderate priced varieties.

	Doz.	100	1000
Alcazar (Vilmorin, 1910). Certificate, N. H. F., 1909; F. C. C. R. H. S., 1916. S. light bluish violet; F. deep purple with bronze-veined throat. Striking flower.....	\$2.50	\$18.00	\$170
* Archeveque (Vilmorin, 1911). C. R. H. S., 1916. S. deep purple-violet; F. deep velvety violet. 24 inches.	3.00	20.00	180
Brooksiana. Charming flowers of neat form, self-colored delicate rose-lilac, without veining. Beautiful in masses.....	1.10	6.00	50
* Caterina (Foster, 1909). A. M., R. H. S., 1916. Lavender-blue and lilac of same coloring as Pallida Dalmatica, but taller, with more graceful stem. A beautiful flower, but a poor grower in cold sections. 48 inches	3.00	20.00	175
Caprice (Vilmorin, 1904). Cert., N. H. F., 1916. S. rosy red; F. deeper rosy red. Large and handsome. 24 inches	1.25	8.00	70
* Cherubin. This may be described as a pale edition of Her Majesty. The standards are very pale lilac, the falls are pale lilac thinly veined with purple	1.75	12.00	100
Fairy (Kennicott, 1905). White, delicately bordered and suffused pale blue. The tallest standard variety giving a white effect. Not new but not known or appreciated as it should be. 40 inches.....	1.00	5.00	40
Helga. Lemon-yellow with pearl shading. Huge flower.....	1.00	5.00	40
Ingeborg (Goos & Koenemann, 1908). A. M., R. H. S., 1916. The only pure white intermediate in general cultivation. Strong grower and free bloomer.....	1.10	6.00	50
* Isoline. Round standards of pale pinkish buff, strongly flushed mauve; the sharply reflexed falls are Chinese violet with russet tints at the sides; bewildering shades but most attractive.....	3.00	20.00	175
Juniata. A stately plant with gracefully carried mauve to manganese violet blossoms	1.00	5.00	40
* Jeanne d'Arc (Verdier, 1907). S. very large and ruffled, somewhat spreading, white, delicately penciled lilac; F. white edged lilac at base. The standards being somewhat loosely held, flutter in the breeze in a truly delightful manner.	1.50	10.00	80
* King of Iris (Goos & Koenemann, 1907). A. M., R. H. S., 1916. S. clear lemon-yellow; F. rich maroon, bordered yellow. Brilliant colors. Large flowers. Very fine. 24 inches	1.75	12.00	100

GERMAN IRISES

SIBERIAN IRISES

IRIS KAEMPFERI (Jap. Irises)

IRISES—Continued.

	Doz.	100	1000
* Leonidas. Standards clear mauve; falls rosy mauve. Big, of fine form, handsome	\$1.25	\$8.00	\$60

Madame Chereau. White, elegantly frilled with a wide border of clear blue	1.10	6.00	40
Mandalisca. Rich lavender-purple, tall, large and handsome; very early	1.00	5.00	40
Monsignor. It possesses a distinctive and pleasing shape, rich coloring and a dark outline to the segments for emphasis. Standards violet; falls heavily veined purple, leaving a border of the violet; late to flower.....	1.00	7.00	50
Mrs. Alan Gray. A delicate lavender pink that appears pinker in the shadow, a variety of rather early bloom	1.25	8.00	60
Midnight. A rich deep purple, the finest in this color; a fine cut flower	1.10	6.00	50
Nibelungen (Goos & Koenemann, 1910). S. fawn and yellow; F. violet-purple on bronze. Very large flowers; strong, vigorous grower	1.00	5.00	
* Nuee d'Orage (Verdier, 1905). Syn., Storm Cloud. Cert., N. H. F., 1905. S. slate gray; F. bronze and purple. Large flowers. 24 inches...	1.50	10.00	80
* Oriflamme (Vilmorin, 1904). Cert., N. H. F., 1905; A. M., R. H. S., 1916. S. light blue; F. rich violet-purple. Immense, handsome flowers of Amas form. 30 inches...	3.00	20.00	125
* Pallida Dalmatica (True). A. M., R. H. S., 1916. S. lavender; F. clear, deep lavender. A variety of this name is mentioned in Gerarde's Herbal in 1597, and it has been grown in this country more than one hundred years and is often seen in old gardens, but the true variety is still scarce. Unsurpassed in its class. 40 inches.	2.50	15.00	125
Parisiana (Vilmorin, 1911). S. white ground, dotted and shaded lilac-purple; F. white, frilled at the edge with lilac. Large flowers. 30 inches	1.25	8.00	60
* Prosper Langier (Verdier, 1914). Cert., N. H. F., 1905; A. M., R. H. S., 1916. S. light bronze-red; F. velvety ruby-purple, with white beard yellow tipped. Very handsome. Vigorous growth. 36 in...	1.50	10.00	80
Perfection (Barr, about 1880). H. C., R. H. S., 1916. S. light blue; F. dark, velvety violet-black with orange beard. Handsome flower that attracts much attention in mass. 38 inches.....	1.00	5.00	40
Princess Victoria Louise (Goos & Koenemann, 1910). S. sulphur-yellow; F. rich plum, bordered cream. 30 inches	1.25	8.00	70
Rhein Nixe (Goos & Koenemann, 1910). A. M., R. H. S., 1916. S. white; F. violet-blue with white edge. Tall and large. Very fine. Strong grower. 30 inches.....	1.10	6.00	50

IRISES (German)—Continued.	Doz.	100	1000
Tamerlan (Vilmorin, 1904). S. broadly rounded and somewhat waved, lavender-violet. Very large flowers. \$1.50 \$10.00 \$80			
Thorbeck. S. bluish white; F. deep velvety purple; a very striking and rich contrast.....	1.25	8.00	60
Walhalla (Goos & Koenemann, 1908). S. and F. blue and purple. Strong grower and free bloomer.....	1.00	5.00	30
Wyomissing (Farr, 1909). Soft creamy rose; F. somewhat darker, shaded lighter towards edge.....	1.50	10.00	70

IRISES (Species).

Some very interesting sorts are here listed and described many of them splendid for naturalizing and large permanent plantings.

	Doz.	100	1000
Cristata (Evansia). A dainty native creeping species, only 3 inches in height; flowers rich amethyst-blue; a gem for the rock garden. May	\$2.00	\$15.00	\$125
Cristata Verna. A little Iris with blue flowers, having a yellow center	2.00	15.00	125
PUMILA. These beautiful little Irises do not grow over 4 inches high, and bloom in April and May. They are fine for bordering flower beds or planting in front of the tall Irises.			
Coerulea. Dark violet-blue.....	2.00	15.00	125
Excelsa. A splendid pale lemon-yellow	2.00	15.00	140
Schneecuppe. A large showy pure white	2.00	15.00	140
SIBIRICA (Siberian Iris). Vigorous, free-flowering varieties of the easiest culture; fine for the flower border, for naturalizing and for water-side planting.			
Snow Queen. An exquisite new hardy Iris; the flowers are of a snowy whiteness, large and well formed, produced in great abundance; foliage light and graceful. A gem for flower border or waterside. 3 feet high.....	2.00	15.00	140
Superba. Large, violet blue flowers; handsome foliage. Fine border plant and a grand subject for planting near water, where it blooms profusely.....	1.25	8.00	60
TECTORUM (Tomilopha). A beautiful Chinese species, with distinctive foliage, and loose sprays of flat, deep blue flowers.....	3.00	20.00	175

IRIS KAEMPFERI (Japanese Iris).

The magnificent Iris Kaempferi belongs to the Apogons, and a field of them in bloom is a most gorgeous sight. Seeing them for the first time, one cannot withhold an exclamation of surprise, and having once seen can never forget their striking beauty.

Culture. The secret of success is to keep the ground well stirred, never allowing it to bake or become hard. Any good mellow clay loam will grow Japanese Irises to perfection, if well enriched. They like plenty of moisture during the growing season, but flooding with water is not a necessity, as many suppose. Water standing over the plants for a great length of time in winter is fatal to them.

LIATRIS (BLAZING STAR)

LEONTOPODIUM (EDELWEISS)

LATHYRUS LATIFOLIUS

JAPANESE IRIS—Continued.

Time to Plant. Latter part of August to the beginning of October is the best time. Late plantings should be protected by a light covering of straw or leaves after the ground is permanently frozen, to prevent roots from being heaved out of ground by frost. In northern sections late planting had best be deferred until spring.

	Doz.	100	1000
Gold Bound. A fine double pure white, enriched by a creamy glow from the gold banded center	\$2.50	\$20.00	\$175
Kumo-No-Uye. Six large, frilled petals. Deep indigo blue, shaded purple. Late bloomer.....	2.50	20.00	175
Koko-No-Iro. Six large, royal purple petals, with a yellow center, radiating into lines. Most brilliant Iris.....	2.50	20.00	175
Kumo-No-Obi (Band of Cloud). The lower and upper petals are nearly equal in size. Bright, clear purple, with distinct rays and halo of white surrounding the golden throat, the pure white standards tipped purple... ..	2.50	20.00	175
Nomiji-No-Taki (Maple Water-fall). A choice double variegated variety; bright crimson purple, beautifully feathered in white. Petaloid-stigmas white, purple crested	2.50	20.00	175
Mahogany. Large double flowers, the latest to bloom. Purpled mahogany red. The erect petals prettily crested	2.50	20.00	175
Nagano. Rich violet-purple, shaded with blue. 6 petals....	2.50	20.00	175
Purple and Gold. Enormous double flowers ten inches across, early and free blooming. Color rich violet-purple with white petaloids, tipped violet. The conspicuous golden throat extends outward in sharp bluish white rays.	2.50	20.00	175
Royal Purple. Dark purple, overlaid with dark blue, yellow blotches. Stigmas dark blue, bordered purple. Six petals....	2.50	20.00	175
Queen of the Blues. Pale delft blue veined white. Six petals. Handsome flower	2.50	20.00	175
Tora-Odori (Dancing Tiger). Vin-purple, speckled and splashed gray. Six petals.....	2.50	20.00	175
Mixed Colors. Both single and double varieties. Splendid mixture	2.00	15.00	125

LATHYRUS LATIFOLIUS (Everlasting Pea). These Everlasting Peas are but little known in this country, but are great favorites in England. They are extremely showy and fine. Charming climbers for covering trellises, arbors, etc.

White Pearl. A great improvement on the older white variety, the stems giving from 12 to 15 flowers each	1.50	10.00	80
Pink Beauty. Large racemes of pleasing deep rose flowers.....	1.50	10.00	80
Red. The well known red Everlasting pea	1.50	10.00	80

LAVANDULA (Lavender). **Vera.** This is the true Sweet Lavender; grows about 18 inches high; delightfully fragrant blue flowers in July and August

1.75 12.00 100

LEONTOPODIUM alpinum (Edelweiss). Doz. 100 1000
A well-known Alpine with pretty white leaves and small yellow flowers which are surrounded by star-like heads of leaves, clothed with a dense white, woolly substance. A splendid plant for the rock garden. 4-5 inches. June to August.....

\$2.50 \$20.00 \$180

LIATRIS (Blazing Star, or Gay Feather). **Pycnostachya.** The popular name of this plant is Kansas Gay Feather. Nothing can be planted that will attract more attention on account of its unusual appearance; but it is beautiful as well as odd. It blooms in midsummer and throws up long, narrow spikes of rich purple flowers, which last a long time. A peculiarity of this plant is its great attraction for butterflies

1.75 12.00 100

LILIES (See pages 27, 28 and 29).

LILY OF THE VALLEY (See Convallaria).

LINARIA (Toad Flax). **Dalmatica.** Fine for borders or perennial garden. Glaucous blue foliage and spikes of golden yellow blossoms; miniature Snapdragon. Loves a sunny spot in well drained soil.....

1.50 10.00 90

LINUM (Flax). A desirable plant for the border or rockery, growing 2 feet high, with light, graceful foliage and large flowers all summer.

Flavum. Fine variety with transparent, yellow blossoms.....

1.50 10.00 80

Narbonnense. Forms a spreading clump of attractive foliage with a profusion of azure-blue flowers with white eye. Very handsome for the rockery.....

1.75 12.00 100

Perenne. Very attractive, both in foliage and bloom. Flowers beautiful pale blue on slender, graceful stems

1.50 10.00 75

Perenne. White

1.50 10.00 75

LOBELIA. Handsome border plants, thriving in any ordinary garden soil, but preferring a moist, deep loam. Season August till late September.

Cardinalis (Cardinal Flower). Rich, fiery cardinal flowers. Strong plants, often producing ten to eighteen spikes. 24 to 30 inches long

1.50 10.00 90

LUPINUS (Lupines).

The Lupines produce beautiful long spikes of pea-shaped flowers a foot long on stems three feet high. They are perfectly hardy but cannot endure drought, and must be planted in well-prepared garden soil and kept watered in dry weather.

Doz. 100 1000

Wayside Gardens New Sweet-scented Hybrids (Polyphyllus). A wonderful new strain that may be classed among the most beautiful of all Hardy Flowers. Colors are both rich and delicate in shades of blue, mauve, pink, etc., and the flowers are borne in long spikes that for size and beauty rival giant Snapdragons. The added novelty of being sweet-scented, makes these one of the best garden plants we have ever distributed (see illustration, page 30).....

\$4.00 \$30.00

Polyphyllus. Clear blue.....

2.50 18.00 150

Albus. A white variety.....

2.50 18.00 150

Rosens. A splendid new variety, with flowers of beautifully shaded rose

2.50 18.00 150

	Doz.	100	1000
LYCHNIS (Campion). A fine old-fashioned flower, bearing large heads of brilliantly colored flowers, that liven up the border during summer and early autumn.			
Alpina . Dwarf, rose pink.....	\$2.00	\$15.00	\$125
Chalcedonica . Heads of vivid scarlet flowers, blooming a long time. One of the brightest plants in the hardy border. 3 feet.....	1.25	8.00	70
Chalcedonica, Salmon Queen . A rare and beautiful shade.....	1.50	10.00	80
Haageana . 1 foot. June to August. Very showy; producing orange-red, scarlet or crimson flowers nearly 2 inches across.....	1.50	10.00	80
Viscaria flore pleno . A fine double variety; fine for cutting.....	1.75	12.00	100
LYCORIS .			
Squamigera (Amaryllis Hallii). The attractive green foliage appears in early Spring, ripens and dies down in July. Shortly after, the flower stems bearing delicate lilac-pink flowers make their appearance. 2 feet. July.....	4.00	30.00	
LYTHRUM (Loose strife). Superbum roseum . Very showy; splendid for banks of streams and ponds.....	1.50	10.00	90
LYSIMACHIA . Clethroides (Loose-strife). Long, recurved spikes of pure white flowers, from July to September. A desirable variety. 2 feet.....	2.00	15.00	125
Numbularia (Creeping Jenny, or Moneywort). Valuable for planting under trees or shrubs where grass will not grow.....	1.50	10.00	80
MATRICARIA (See Feverfew; May-weed).			
MAZUS Rugosus . A dwarf and interesting Alpine plant from the Himalayan Mountains, covered in early spring with dainty lilac and white flowers. 4 inches.....	3.00	20.00	
MERTENSIA (Blue Bells). Virginica . An early spring-flowering plant, growing about 1 to 1½ feet high with drooping panicles of handsome light blue flowers, fading to clear pink; one of the most interesting of our native spring flowers.....	1.50	10.00	80
MONARDA OR BERGAMOT (Oswego Tea). Showy plants growing from 2 to 3 feet high, succeeding in any soil or position, with aromatic foliage, and producing their bright flowers during July and August.			
Didyma, Cambridge Scarlet . Brilliant crimson-scarlet.....	1.50	10.00	90
MONTBRETIAS . One of the brightest of our summer-flowering bulbs, and should be set during April or May. They should be protected during the winter with a heavy covering of leaves or litter.			
Crocusmaeflora . Pure yellow, reverse of petals orange; large flowers.....	1.00	5.00	45
King Edmund . A robust grower with large, open flowers, rich yellow, with a carmine-blotched center.....	1.00	6.00	55
Lord Nelson . A handsome dark-stemmed variety, flowers of great substance of a rich deep orange, outside vermillion.....	1.00	6.00	55
Prometheus . Large, rich orange marked with deep red at center.....	1.00	6.00	55
Rheingold . A beautiful clear golden yellow; large spike and very vigorous grower.....	1.00	6.00	55
Speciosa . Richest of all in color; flowers large of intense scarlet shade.....	1.00	5.00	45

LILIES (Hardy Garden Varieties).

Noble and beautiful flowers which are too frequently strangers in American gardens. It is always with a touch of sadness that we note the infrequency of Lilies in American gardens. No flower, it seems to us, is at once so noble and so beautiful. Nor is there lack of variety. Furthermore, the Lily is singularly valuable for its charming effect on the skyline of the garden when in bloom.

There is a notion that Lilies are "hard to grow." Some of the rarer species are, it is true; they not only stubbornly refuse to make themselves at home in the garden unless conditions are precisely to their liking, but some of them cannot endure the Northern winter without the necessary covering of litter, which many other tender plants require. Unless one goes in for Lilies to the extent of making a hobby of them, however, these can all be left to the collector and there will be quite enough species remaining to give one a Lily Season in the three months' duration of which loveliness follows loveliness with breaks of only relatively brief length. We say species for the reason that the Lilies in cultivation show an exceptionally low percentage of horticultural varieties. Possibly because nature made every species perfect to begin with, the hand of the hybridizer has been loath to endeavor to "paint the Lily," as it were.

The varieties which we offer in these three pages are such as have, with us, withstood the summer's drouth and the severest of winters, and have thus proven themselves worthy of a place in your garden.

DELIVERY—This depends upon the arrival of the bulbs from our foreign sources. Many get here too late for autumn planting, thus necessitating carrying over the bulbs until spring. Those marked (**) thus, may be planted in the fall only; those marked (*) may be planted in spring or fall, preferably the latter; all the others are for spring delivery.

Auratum (Golden-banded Japan Lily). Undoubtedly one of the finest. Its large, graceful, fragrant flowers are composed of six petals of a delicate ivory-white color, thickly studded with chocolate-crimson spots and striped through the center a golden yellow; 3 to 5 feet. July to September.

	Three	Doz.	100
Large Bulbs	\$0.80	\$3.00	\$22
Mammoth Bulbs	1.40	5.00	40

Auratum platyphyllum. Also called "Macranthum." This is a robust growing form; the stem is stouter and attains a greater height; the leaves are much broader; enormous flowers, white, richly spotted yellow. Undoubtedly the choicest of all. Large Bulbs.....

Large Bulbs.....	1.40	5.00	35
Mammoth Bulbs	1.75	6.00	50

Auratum rubro vittatum. Similar to the above but the flowers are dark rose-pink

Large Bulbs.....	1.75	6.00	50
------------------	------	------	----

Batemanni. Strong stems with five to ten flowers of a reddish-orange color. July-August. 3 to 4 feet..

Large Bulbs.....	1.10	4.00	30
------------------	------	------	----

LILIIUM
BROWNII

LILIIUM REGALE

LILIIUM
CANDIDUMLILIIUM
DAVURICUM**HARDY LILIES**—Continued.

	Three	Doz.	100
Brownii Odorum. A vigorous grower with large trumpet-shaped flowers of clear white, veined outside with purplish maroon.....	\$2.50	\$9.00	\$65
* Canadense. Our dainty beautiful native Lily. Graceful and charming flowers40	1.50	10
** Candidum (Madonna or Annunciation Lily). This is the old-fashioned garden Lily, and one of the most beautiful. Ready in September only80	3.00	25
* Chalcedonicum (Scarlet Turk's cap Lily). Small flowers in loose clusters with recurved, bright red petals. A handsome and attractive Lily. July. 3 to 4 feet.....	4.00	15.00	
* Davuricum. This beautiful Lily comes from the home of <i>L. tenuifolium</i> in Siberia. It resembles a native <i>Philadelphicum</i> . It is of easy culture, grows two or three to five upright scarlet flowers, dotted black50	1.75	12
Giganteum (Easter Lily). 4 to 5 feet. July and August. Most majestic of all the Lilies. White, fragrant, funnel-shaped flowers90	3.25	25
Hansonii. Most desirable, not particular in its cultural requirements and extremely handsome in flower; does well in light loam. Plant among shrubs and low plants to protect young shoots, this being one of the earliest Lilies to appear in the spring. The stem reaches a height of 4 to 5 feet, carrying blossoms 2 inches across, regularly reflexed, the petals being of a bright orange spotted more or less with brown, of a waxy texture. Admirable for pot culture. June flowering	1.75	6.50	50
* Henryi. A new Japanese Lily that has made a sensation in Europe. It has the same form and appearance as the <i>Speciosum</i> varieties, but the flowers are bright orange yellow. We grow this variety now ourselves from seed. They are as hardy as a tree. Shipment October 1st to May 1st.....	1.40	5.00	35
Krameri. Unique for its color and grows from 2 to 4 feet high. The funnel-shaped finely formed flowers are 6 inches or more in length and as much across, of a beautiful clear pink color, often shaded blush	1.10	4.00	30
* Martagon (Dalmaticum, Turk's Cap Lily). A handsome Lily, bearing clusters of purple, wax-like flowers. Thrives best in partial shade. June. 5 feet.....	1.40	5.00	40
Pardalinum (Leopard Lily). Flowers reflexed, bright yellow at base, spotted brownish-purple, remainder orange-scarlet. 3-4 feet. July and August80	3.00	20
* Regale, or myriophyllum (The Regal Lily). It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most Lilies. Blooms out-of-doors early in July. Strong bulbs, flowering size	1.40	5.00	35

HARDY LILIES—Continued.

Three Doz. 100

Rubellum. Beautiful small Lily.

The color varies from a deep rose-pink to almost white, with yellow anthers; very fragrant, small, funnel-shaped flowers; grows 1½ feet high. It does best in light soil

\$1.00 \$3.50 \$25

Speciosum album. The Speciosum or Lancifolium are the most important of all the Japanese Lilies, always satisfactory. The variety here offered has large white flowers of great substance, with a greenish band running through the center of each petal. Large Bulbs. Mammoth Bulbs

.80 3.00 20
.75 5.50 40

Speciosum magnificum. Magnificent large flowers of rich deep red. Large Bulbs

.80 3.00 22
1.50 5.50 40

Speciosum Melpomene. A darker shade of red and crimson markings than the preceding.

Large Bulbs

.80 3.00 22
1.50 5.50 40

***Superbum.** 3 to 4 feet. July. Flowers bright reddish-orange, conspicuously spotted

.40 1.50 10

***Tenuifolium** (Siberian Coral Lily). A most delicate and charming species. Growing from 1 to 2 feet high, it bears often from 1 to 12 or more nodding rich scarlet flowers

1.10 4.00 30

***Tenuifolium "Golden Gleam."** Similar in form to the preceding. Flowers are a delicate apricot shade

2.00 7.50 55

***Testaceum** (Excelsum or Nankeen Lily). This is one of the finest of all Lilies. The color is difficult to describe, being a shading of dull apricot with orange-yellow anthers. A most graceful Lily and a good companion to L. Candidum. June-July. 5 feet. Extra large flowering bulbs

6.00 22.00

***Thunbergianum (elegans) sanguineum.** Dark crimson. The Thunbergianums are all of the easiest culture and bloom in June.....

.80 3.00 20

***Tigrinum flore pleno** (The double Tiger Lily). The only Double Tiger Lily worth growing.....

.50 1.75 12

***Tigrinum simplex** (The well known Single Tiger Lily). Of easiest culture and worthy of general planting on account of stateliness.

.50 1.75 12

L. SUPERBUM

LIL. TESTACEUM

L. SPECIOSUM

LIL. AURATUM

MITELLA diphylla (Bishop's Cap). Doz. 100 1000

A gem for a shady position. Feathery spikes of creamy-white flowers, 12 to 18 inches. May and June....

\$1.50 \$10.00 \$90

MYOSOTIS (Forget-me-not). **Alpestris** (Alpine Forget-me-not). Splendid for naturalizing on edge of ponds and streams; also for beds, borders, and rockeries

1.50 10.00 90

Palustris semperflorens. Large rich blue flowers with yellow eye, a charming plant for damp places and a more profuse bloomer than the type

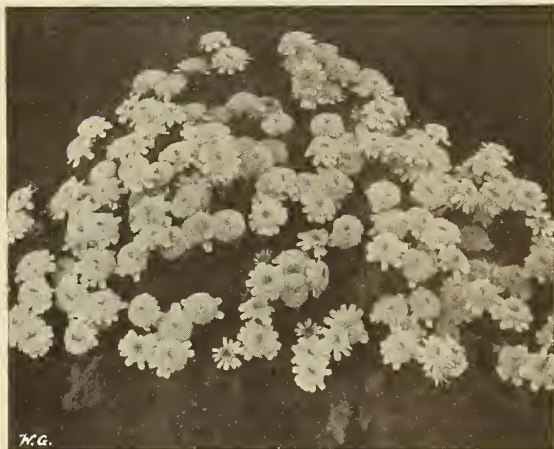

1.50 10.00 90

NEPETA (Ground Ivy; Catnip; Catmint). **Mussini.** An excellent plant for any position, but especially useful in the rock garden. Of dwarf, compact habit, producing masses of bloom of a beautiful shade of lavender. 1 to 1½ feet.....

1.75 12.00 100

LUPINUS

MATRICARIA

NEPETA MUSSINI

NIEREMBERGIA (Cup Flower). **Rivularis.** A charming dwarf creeping Alpine plant, bearing large creamy-white, cup-shaped flowers from June till September; most desirable plants for the rockery..... Doz. 100 1000
\$1.75 \$12.00 \$100

OENOTHERA (Evening Primrose). Elegant for a sunny position in the border or on the rockery, blooming all summer.

Fraseri. 1 foot. June to October. Flowers large, pale yellow..... 1.75 12.00 100

Fruticosa major. 2 feet. June to September. A strong-growing plant, forming a dense bush-like specimen; flowers deep yellow, in profusion 1.75 12.00 100

Youngi. 2 feet. June to August. A strong, stocky large-leaved plant with firm, shiny foliage; numerous bright lemon-yellow flowers.. 1.50 10.00 80

Missouriensis. 10 inches. June to August. A low species with prostrate, ascending branches; profuse bloomer. Solitary flowers, often 5 inches across. Good for rock garden or border..... 1.50 10.00 90

Speciosa. Pure white flowers 3 inches across. 18 inches..... 1.50 10.00 80

ONOSMA (Golden Drop). **Stellatum.** A rare and beautiful plant for the rock garden. It forms an evergreen tuft of leaves and bears during May and June drooping clusters of amber-colored, drop-shaped blossoms, deliciously almond-scented. It should be given a sunny, well-drained position. 9 to 12 inches..... 3.50 25.00

PACHYSANDRA (Japanese Spurge).

Terminalis. A trailing plant 6 to 8 inches high, forming broad mats of bright glossy green foliage and small spikes of flowers during May and June. A ground cover, which will grow in all shady situations and the only plant which will thrive under pine trees; better and hardier than Ivy or any other shade-loving dwarf plant. Strong 1-year field-grown plants. Per 1000 \$75.00; dozen \$1.25; 100 \$8.00.

PARDANTHUS (Blackberry Lily). Very pretty perennial with lily-like flowers of a very handsome appearance. Requires a rich soil and a sheltered situation in winter.

Chinensis. Flowers orange-colored, spotted with purple-brown. 18 in. Doz. 100 1000
\$2.00 \$15.00 \$125

PAPAVER (Poppy). These are the regal representatives of this popular genus, growing 3 to 3½ feet high, and far surpassing in splendor of bloom all the annual and biennial kinds, and for a gorgeous display of rich and brilliant coloring nothing equals them during their period of flowering in May and June, and whether planted singly or in masses their large flowers and freedom of bloom render them conspicuous in any position. They are of the easiest culture; almost any kind of soil suits them, but they do best in deep, rich loam. Set the plants out in fall or early spring before the first of May—give them water occasionally during dry spells in the early part of the season. Mulch with stable litter in fall; and they will increase in size and floriferousness for several years. We offer on next page the best of the latest introductions, as well as the following distinct standard varieties. Illustrations on page 36.

Orientalis (Oriental Poppy). Tremendous scarlet, cup-shaped blooms of brightest crimson-scarlet, with large purplish-black blotches at base of petals, creating a wonderful contrast when bloom is fully open. Clumps of these throughout the border add a brilliancy that no other flower can provide.. Doz. 100 1000
\$1.25 \$8.00 \$65

PAPAVER—Continued.		Doz.	100	1000

PACHYSANDRA UNDER TREES

MYOSOTIS ALPESTRIS

PHLOX
SUBULATA

PHLOX AMENA

PH. MISS LINGARD

PHLOX
DIVARICATA

PHLOX Decussata (Hardy Phlox).

Perennial Phloxes succeed in almost any soil enriched with manure in spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, they will produce a second supply of flowers, continuing the display until late in autumn. These later blooms are often finer than the first.

(We offer nothing but strong, 2-year-old plants.)

(*These for fall delivery, 1925.)

	Doz.	100	1000
Athis. Deep, clear salmon. Very fine	\$1.40	\$8.00	\$70

Mariesi. Blue. 12 to 15 inches. July until late September. A beautiful dwarf species, with broad, thick foliage and large, deep violet-blue flowers 1.25 8.00 70

Mariesi alba. White-flowered form of the above 1.25 8.00 70

PLUMBAGO (Leadwort). **Larpentae.** One of the most desirable border and rock plants. It is of dwarf, spreading habit, growing 6 to 8 inches high; covered with deep blue flowers during the summer and fall. 1.50 10.00 80

POLEMONIUM humile coeruleum (Richardsonii) (Jacob's Ladder). Erect stems of sky-blue flowers. 1 to 1½ feet. June to July 1.75 12.00 100

humile album. A white variety of the preceding 1.75 12.00 100

Reptans (Greek Valerian). 8 to 10 inches. April to June. Dwarf, bushy plant of graceful growth. Showy blue flowers. Rock garden and fine border plant 2.50 18.00

POLYGONATUM (Solomon's Seal). **Multiflorum major.** Pendant sprays of greenish white flowers borne on long stems 2 feet. May and June. A grand plant for a shady position, where it has plenty of room to show off its wonderful pendulous sprays of bells. Fine for cutting 2.00 15.00

PRIMULA (Hardy). Splendid little plants for naturalizing near shrubs, in the border or shaded nooks on the rockery.

Cashmeriana (New). Large globular heads of a pleasing purplish blue shade; prefers a moist shaded situation 1.50 10.00 80

Veris Hybrids. This strain includes various shades of lilac, purple and violet, as well as a wide range of buff, orange, salmon, and rich reds approaching scarlet in intensity. Quite hardy and of vigorous growth 1.50 10.00 80

Vulgaris. The old English primrose with pale yellow flowers 2.00 15.00

PYRETHRUM (Persian or Painted Daisy).

The Pyrethrums are so simply and easily cultivated that they may be recommended to all who possess a garden. They are perfectly hardy and absolutely invaluable for cut flowers through the summer and early summer. The flowers are bright and elegantly borne on long stems; most convenient for decoration. In form, the double varieties are somewhat aster- or chrysanthemum-like, and as their chief beauty is in the months of May and June, they may well be designated Spring Chrysanthemums, possessing the advantage over the Chrysanthemums of being able to withstand the severest winter without protection. The single-flowered varieties are variable-colored Marguerites and possess a range of color and hardness that Marguerites might envy in vain. Nothing can surpass the Pyrethrum profusion of flowers throughout the entire summer from May to July, and the blossoms are not injured by storm or sun. As a cut flower, their long stems make them ideal for decorative purposes. Their position should be in the border or in beds (illustration on next page).

All Colors Mixed. Strong, 2-year clumps Doz. 100 1000 \$1.25 \$8.00 \$65

	Doz.	100	1000
RANUNCULUS (Buttercups). Repens fl. pl. A pretty, double-flowering, bright golden yellow buttercup; masses of flowers in May and June. \$1.50 \$10.00 \$80			
RUDBECKIA (Coneflower). Golden Glow . One of the most popular hardy plants. Grows six feet high, producing masses of large, double, golden yellow flowers, shaped like a cactus dahlia 1.40 9.00 70			
Newmanni . The perennial form of the "Black-eyed Susan." Deep orange-yellow flowers, with a dark purple cone; long, wiry stems 3 feet high; blooms all summer.... 1.50 10.00 80			
Purpurea (Giant Purple Coneflower). Peculiar reddish-purple flowers, with a very large, brown, cone-shaped center. Blooms from July to October. 3 feet..... 1.50 10.00 80			
Maxima . A rare and attractive variety, growing 5 feet high, with large glaucous green leaves and bright yellow flowers 5 to 6 inches across, with a cone 2 inches high; flowers continuously from June to September 2.00 15.00 125			
SALVIA (Meadow Sage). Azurea . A Rocky Mountain species. Grows 3 to 4 feet high, producing during August and September pretty sky-blue flowers in the greatest profusion 1.50 10.00 80			
Pitcheri . Similar to the above, but of more branching habit and large flowers of a rich gentian-blue color, and one of the most admired plants by the many visitors to our nurseries during the early autumn. 3 to 4 feet..... 2.50 18.00 150			
Farinacea . Beautiful pale blue flowers..... 1.75 12.00 100			
Turkestanica . Extremely decorative sweet-scented foliage and showy whorls of white flowers surrounded by pale pink..... 2.00 15.00 125			
Virgata nemorosa . Distinct and effective foliage with showy whorls of white flowers..... 1.75 12.00 100			
SANTOLINA (Lavender Cotton, Ground Cypress). A sweet-smelling, dwarf evergreen perennial, with delicate silver-white foliage, useful as rock or border plants; also largely used in carpet bedding.			
Chamaecyparissus (incana) . 1 foot. 1.50 10.00 80			
SAPONARIA . Ocymoides splendens . Pretty border and rockery plant; flowers rosy-pink 1.50 10.00 80			
Ocymoides alba . A grand pure white flowering plant for wall or rockery. 2.00 15.00 125			
SAXIFRAGA (Megasea). Ligulata . These will thrive in any kind of soil and in any position. Grow about 1 foot high, and are admirable for the front of the border or shrubbery, forming masses of handsome, broad, deep green foliage, which alone renders them useful, while the pretty flowers, which appear very early in the spring, some almost as soon as the frost is out of the ground, make them doubly effective..... 3.50 25.00 225

STOKESIA.

CYANEA (Cornflower Aster, Stokes Aster).

A most charming and beautiful native hardy plant which, for many seasons, has been the most admired flower on our grounds. The plant grows from 18 to 24 inches high, bearing freely from early July until late in October, its handsome lavender-blue centaurea-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position, desirable as a single plant in the hardy border and effective in masses or beds of any size.

Coerulea. Beautiful light blue	\$1.50	\$10.00	\$80
Alba. White-flowered form of above. 1 foot to 18 inches	2.00	15.00	125
Mixed. Shades of blue, white, violet and purple	1.50	10.00	80

SWEET WILLIAM (See *Dianthus Barbat*us). Doz. 100 1000

THERMOPSIS. Caroliniana. A showy, tall-growing plant, attaining a height of 3 to 4 feet, producing long spikes of yellow flowers in June and July \$2.50 \$18

THALICTRUM (Meadow Rue). **Aquilegifolium.** Graceful foliage like that of Columbine, and rosy-purple flowers from May to July. 2 to 3 feet 2.00 15.00 125

Adiantifolium. A beautiful variety, with foliage like the Maidenhair Fern and miniature white flowers in June 2.00 15.00 125

Dipterocarpum. A pretty and distinct species, with flowers of a charming shade of lilac-mauve, which is brightened by a bunch of lemon-yellow stamens and anthers. The plant is of strong growth, about 4 feet high. The dainty flowers are produced in graceful sprays during August and Sept. 3.50 25.00

THYMUS (Thyme).

The charming Mountain Thymes make a perfect close fragrant carpet on hot dry sunny banks where grass is difficult to establish; they are a sheet of blossom in June and July. Excellent for carpeting patches of spring-flowering bulbs.

(*These varieties ready fall, 1925.)

Doz. 100 1000

***Serpillum** (White Mountain Thyme). Forms dense mats of dark green foliage and clouds of white flowers. 3 to 4 inches. June-July.... 3.50 25.00

***Lanuginosus.** (Woolly-leaved). Woolly foliage with bright pink flowers 3.50 25.00

***Coccineum.** Plants become completely covered with brilliant crimson-scarlet flowers 3.50 25.00

***Album.** A wonderful contrast with the preceding; flowers a sheet of white 3.50 25.00

***Citriodorus aureus.** The golden yellow form of the well-known "Lemon Thyme" 2.50 18.00

Vulgaris. 6 inches. June and July. An old garden plant, being grown as a sweet herb; flowers small, lilac or purplish, in terminal, interrupted spikes; foliage very fragrant. Fine for rock garden.... 1.50 10.00 90

TIARELLA (Miterwort). **Cordifolia.** 6 to 12 inches. May. An elegant plant with fine foliage and small, creamy white, star-shaped flowers. Prefers partial shade..... 1.50 10.00 90

TRADESCANTIA (Spiderwort). **Virginica.** Produces a succession of blue flowers all summer. 2 feet.... 1.50 10.00 90

Virginica alba. A white-flowered form 1.50 10.00 90

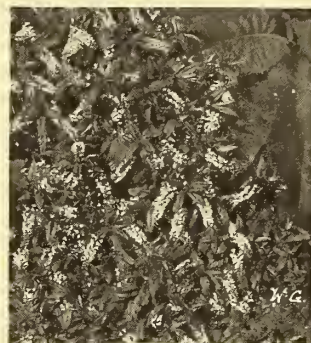

TRILLIUM (Wood Lily, or Wake Robin). **Grandiflorum.** Excellent plants for shady positions in the hardy border, or in a sub-aquatic position. Large pure white flowers in early spring. 12 to 18 inches..... 1.25 8.00 70

PFITZER'S
TRITOMA

TRITOMA "RUFa"

VERONICA
RUPESTRIS

VERONICA SUBSESSILIS

TRITOMA (Red-hot Poker, Flame Flower, or Torch Lily).

Pfitzeri (The Everblooming Flame Flower). The free and continuous blooming qualities of this variety have made it one of the great bedding plants, and when we consider that there are few flowering plants which are suitable for massing under our severe climatic conditions it is little wonder that such an elegant subject should become so popular. Succeeds in any ordinary garden soil, but responds quickly to liberal treatment. Hardy if given protection, but the most satisfactory method of wintering is to bury the roots in sand in a cool cellar. In bloom from August to October, with spikes 3 to 4 feet high, and heads of bloom of a rich orange-scarlet producing, a grand effect either planted singly in the border or in masses (illustrated on page 39) Doz. 100 1000 \$3.00 \$20.00

Rufa. Each plant will produce from 10 to 15 flower-stalks of medium size; flowers are pale orange-yellow, rather small but blooms appear in July and all through the summer until frost. 2.00 15.00 \$125

Quartiniana. A strong growing, thick stalked variety, blooming late in May with flower cones 10 to 12 inches long. Orange-red at first, but yellow on bottom half as bloom matures. Perfectly hardy here; does not need protection 3.00 20.00 175

Uvaria grandiflora. 3 to 4 feet. The old-fashioned, late-flowering sort, with flowers rich red changing to salmon-pink. Needs slight protection 2.00 15.00 125

TROLLIUS (Globe Flower). **Europaeus**, **Orange Globe**. Desirable free-flowering plants, producing their giant bright yellow, buttercup-like blossoms on stems 1 to 2 feet high from May until August; succeed admirably in the border in a half shady position in well-drained soil. 3.50 25.00 225

***Europaeus Superbus**. An extremely large-flowered variety, with beautiful rich yellow flowers in great profusion 6.50 50.00

***Lemon Queen**. Large flowers of pale lemon-yellow; very handsome. 6.50 50.00
(*For fall delivery 1925.)

TUNICA Saxifraga. A pretty tufted plant with light pink flowers, produced all summer. Useful either for the rockery or the border. 1.50 10.00 80

VALERIANA (Valerian, Garden Heliotrope). **Coccinea**. Showy heads of old-rose flowers. June to October. 2 feet 1.50 10.00 80

Officinalis (Hardy Garden Heliotrope). Produces showy heads of rose-tinted white flowers during June and July, with delicious, strong heliotrope odor. 3 to 4 ft. 2.00 15.00 125

VERBASCUM (Mullein). **Olympicum** (Greek Mullein). The showiest of the entire family of more than thirty varieties. The foliage is silvery white, with leaves often 3 feet long. The flowers are yellow, and are produced in quantity for about three weeks in midsummer. Succeeds best in a dry situation. 3 to 5 feet. 2.00 15.00 125

Wayside Gardens Hybrids. An excellent strain produced from a very superior grade of English Hybrids. Colors are most interesting. 2.00 15.00 125

VERONICA (Speedwell).

A family containing some of the most beautiful subjects for the hardy garden and rockery. Given a rich, well-drained soil in an open situation in full sun, they will all thrive in an amazing manner.

THREE CHOICE VERONICAS FOR FALL DELIVERY 1925

	Doz.	100	1000
Amethystina "Royal Blue." Beautiful spikes of rich Gentian-blue flowers. 1 foot. June and July. \$3.50 \$25.00			
Rupestris Trehani . A fine dwarf trailing variety with clear blue flowers 3.50 25.00			
True Blue . Literally covers itself with blossoms of intense blue. 1 foot 3.50 25.00			

THE FOLLOWING ARE OBTAINABLE THIS SPRING

Amethystina . 8 to 12 inches. June. A slender species, with short spikes of amethyst-blue flowers. 1.50 10.00 \$90			
Incana . 1 foot. July and August. A white, woolly plant; flowers numerous; blue. Has good appearance, both in and out of bloom. Useful in rockery or border. 1.50 10.00 90			
Longifolia subserialis . 2 feet. July to September. One of the handsomest blue-flowering plants. Perfectly hardy and increases in strength and beauty each year. Spikes completely studded with beautiful blue flowers; fine for cutting and one of the best plants for the hardy border. 1.50 10.00 80			
Repens . 3 to 4 inches. May and June. A useful rock or carpeting plant with light blue flowers. 1.50 10.00 90			
Rupestris . A fine rock plant growing 3 to 4 inches high; thickly matted deep green foliage, hidden in spring under a cloud of bright blue flowers 1.50 10.00 90			
Spicata . 18 inches. June and July. Long spikes of violet-blue flowers. 1.50 10.00 80			
—alba . Long spikes of snowy white flowers 2.00 15.00 140			
—rosea . 2 feet. June to September. Much-branched variety with pink flowers 2.00 15.00 130			
Virginica (Great Virginian Speedwell). A free-growing perennial which likes the bright sunshine. Flowers white or pale blue. 2 to 6 feet. August to September. 2.00 15.00 140			

VINCA (Periwinkle, or Trailing Myrtle). **Minor**. A trailing, evergreen plant, used extensively for carpeting the ground under shrubs or trees or on graves, where it is too shady for grass or other plants to thrive. 1.50 10.00 85

VIOLA (Tufted Pansy). This is the best edging plant for the hardy border or garden; when properly cared for these plants remain in full bloom from May until October. The great secret of their continuous bloom, though, is the fact that they must be sheared several times during the season, so that the flowers do not go to seed.

Cornuta Hybrids.

Jersey Gem (New). Possesses the dwarf habit and continuity of blooming of the true horned Viola (*V. cornuta*), and the vigorous, bushy growth and roundish foliage of the finest English bedding varieties. Color is pure, rich violet, and slightly perfumed. 2.50 25.00

VIOLA —Continued.	Doz.	100	1000
G. Wermig. A variety of Tufted Pansy, forming clumps which are covered with rich violet-blue flowers the entire season..	\$1.50	\$10.00	\$80
Cornuta Turingia. Rich slaty-blue flowers produced continuously in great profusion.....	1.00	7.00	60
Admiration. Light blue.....	1.50	10.00	60
Golden Yellow	1.50	10.00	60
White Perfection	1.50	10.00	60
Purple Queen	1.50	10.00	60
Rose Queen	1.50	10.00	60
Mixed. Many shades and markings	1.50	10.00	60

VIOLA Odorata (Sweet Violet). The variety listed below is suited for forcing under glass; and perfectly hardy, and is covered with flowers in early spring and wonderfully sweet scented.

Gov. Herrick. Rich, deep purple... 1.50 10.00 80

Double Russian. Not suited for forcing under glass, but is perfectly hardy, producing in early spring, large, double, deep purple flowers of exquisite fragrance.... 3.50 25.00

WALLFLOWERS. The old fragrant favorite; mixed colors, choice English imported strain including yellow, brown, etc. Plant in spring only 1.50 10.00 90

WULFENIA carinthiaca. A rare plant for the rock garden. Glossy, deep green leaves and handsome spikes of rich blue flowers. 9 to 12 inches. July 3.50 25.00

YUCCA (Adam's Needle). **Filamentosa.** Among hardy plants there is nothing more effective and striking for isolated positions on the lawn or on dry banks where few other plants thrive. It is also indispensable for the rockery. Its broad, sword-like, evergreen foliage and immense branching spikes of drooping, creamy white flowers, rising to a height of 6 feet, render it a bold and handsome subject wherever placed. Should be planted in spring.

3-year-old plants 2.00 15.00 125

4-year-old plants 3.00 25.00 225

HARDY SHRUBS

Varieties Used with Herbaceous Plants in Hardy Plant Borders and Gardens

	Doz.	100
BUDDLEIA variabilis magnifica. Butterfly Bush. This is properly a shrub, but the top usually freezes back, and new growth starts from the root like other perennials. Plants grow three to four feet and are covered with long racemes of lilac-like flowers in July. The best location is in good, rich, well-drained soil in a sunny situation	\$4.00	\$30.00

	Doz.	100	1000
CARYOPTERIS Mastacanthus (Blue Spirea). A handsome hardy perennial; grows about 3 feet high and produces rich lavender-blue flowers in great profusion the whole length of the branches. A valuable plant either for bedding or pot culture, blooming continuously from early in September until cut by frost.....	3.50	25.00	

HARDY SHRUBS—Continued. Each Doz. 100

COTONEASTER HORIZONTALIS

(Prostrate Cotoneaster). A low shrub with almost horizontal branches. Native of China. Leaves dark green, about half an inch long; flowers pinkish white; fruit bright red; attractive in rockeries. A most desirable ground-cover. This plant will be largely planted as soon as well known.

Strong 5 in. pot plants..... \$0.75 \$7.50

DAPHNE (Garland Flower). Handsome dwarf sub-shrubs, mostly evergreen, excellently suited for planting near the front of shrubberies, with odorous pink flowers, and handsome foliage.

Cneorum (Garland Flower). Long procumbent branches, and bright, pink, sweetly-scented blossoms; evergreen foliage. Blooms in April and again in September.

1 foot 1.50 15.00

DESMODIUM Penduliflorum. An exceedingly graceful shrub-like plant covered with purplish-red flowers in summer time when little else is in bloom. Strikingly beautiful. 4.50 \$35.00

HYPERICUM (St. John's Wort). **Henryi.** The same as Moserianum, though slightly more upright in growth and much hardier and better suited for cold climates..... 4.00 30.00

Moserianum (see page 22).

VITEX Macrophylla. In general habit similar to V. Agnus Castus, but much stronger in all its parts, the foliage being larger while the trusses of lavender-blue flowers are fully double the size. It blooms from July to September, and is likely to become as popular as the Butterfly Shrub, to which we consider it far superior. Strong young pot-grown plants..... 1.50 15.00

HEDGE PLANTS

BERBERIS THUNBERGII (Japan Barberry) Where a dwarf deciduous hedge is wanted, nothing equals this beautiful Barberry. Requires but little pruning to keep in shape. The leaves are small, light green, and towards fall assume rich, brilliant colors, the fruit or berries becoming scarlet. Absolutely hardy in all parts of the country. Plant 12 to 15 inches apart.

	Doz.	100	1000
Extra strong, 3-year-old plants, 18 to 24 inches high	\$3.00	\$20.00	\$150

SPIREA Van Houttei (Bridal Wreath). The grandest of all the Spireas, and one of the very best of all shrubs. A complete fountain of pure white bloom in May and June Doz. 2.00 15.00 140

CLEMATIS JACKMANII

CLEMATIS PANICULATA

CLIMBING PLANTS AND VINES

Doz. 100

AMPELOPSIS VEITCHI (Boston Ivy, or Japan Ivy). The most popular climbing plant for covering brick, stone or wooden walls, trees, etc. When it becomes established it is of very rapid growth, and clings to the smoothest surface with the tenacity of ivy. The foliage is of a rich olive green during the summer, changing to various shades of bright crimson and scarlet in the fall. In planting Ampelopsis of all kinds, the plants, if still in a dormant condition, should be cut down to within 6 inches of the ground, so that the new growth may cling to the wall or tree from the bottom up.

Extra strong, 2-year-old plants..... \$1.00 \$30.00

ARISTOLOCHIA SIPHO (Dutchman's Pipe Vine). A vigorous and rapid-growing climber, bearing singular brownish-colored flowers, resembling in shape a pipe. Its flowers, however, are of little value compared to its light green leaves, which are of very large size, and retain their color from early spring to late fall. Perfectly hardy strong plants.....

9.00 70.00

BIGNONIA (Trumpet Vine). For covering unsightly places, stumps, rock work, or wherever a showy flowering vine is desired, the Bignonias will be found very useful. The flowers are large, attractive, and borne profusely when the plants attain a fair size.

Radicans. Dark red, orange throat, free blooming and very hardy..... 3.00 20.00

CALYSTEGIA Pubescens (The Double Japanese Convolvulus). A vigorous climbing vine with attractive, double pink flowers

2.50

Doz. 100 1000

CLEMATIS Paniculata (Japanese Virgins' Bower). This handsome hardy climber is one of the choicest and most satisfactory climbing flowering plants. Of strong, rapid growth, with small, dense, cheerful green foliage, and pure white, deliciously fragrant flowers, which appear in the greatest profusion in August and September, followed by silvery feathery seed pods, which make an attractive appearance until mid-winter.

1 year	\$1.75	\$12.00	\$100
2 year	2.00	15.00	125
3 year	3.00	20.00	175

Jackmanii. Beautiful, large, deep purple flowers

11.00 100.00

Montana Perfecta (Anemone Clematis).

A strong, vigorous, extremely hardy variety, thriving under most adverse conditions. Its large white flowers expand in April and May, and is the best of our spring climbers

4.00 30.00 275

Montana Rubens. Flowers rosy-pink, with beautiful green foliage, shaded bronze.

4.00 30.00 275

Orientalis (Tangutica or Graveolens).

This is the beautiful "Golden Clematis" admired for its rich yellow flowers in midsummer; a vigorous, free-flowering and hardy vine, often flowering again in autumn

4.00 35.00

CLIMBING PLANTS AND VINES—Continued.

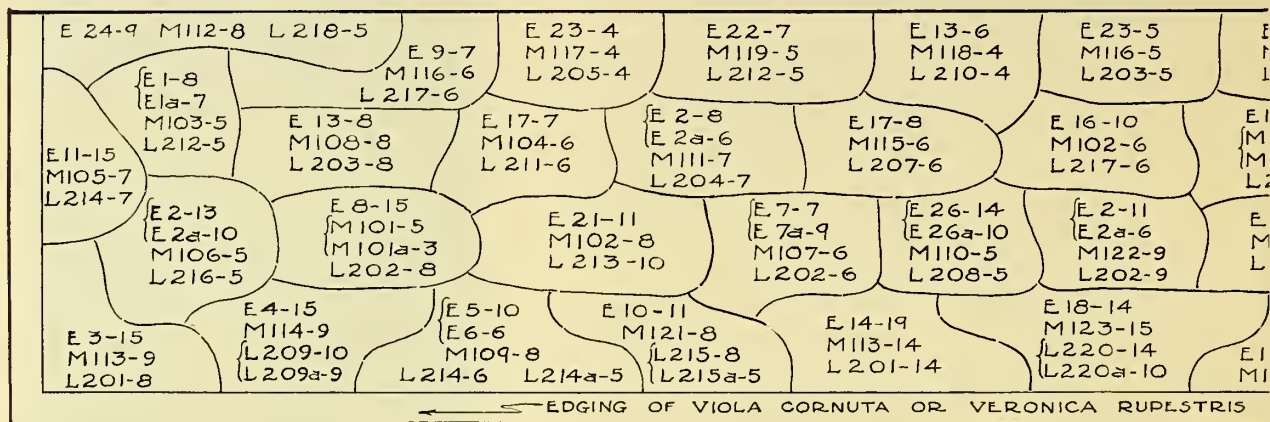

- EVONYMUS.** The trailing Evonymus are particularly desirable for their dense evergreen foliage and extreme hardiness, some varieties on account of this taking the place of the English Ivy for wall covering, others that of the boxwood as an edging plant. Makes a splendid ground cover, and one of the best creepers for rockeries.
- Radicans.** Deep green foliage, useful for covering low foundation walls, or may be clipped the same as boxwood for an edging plant. \$4.00 \$30.00
Extra strong 9.00 70.00
- Radicans Variegata.** A beautiful small-leaved green and white variegated form of the same habit as the type. 4.00 30.00
Extra strong 9.00 70.00
- Radicans Vegetus** (Evergreen Bittersweet). A strong growing variety, with larger leaves than the type, and producing bright orange-red berries, which remain on the plant the greater part of the winter. As an evergreen absolutely hardy wall cover this plant is unequalled. An enthusiastic horticultural writer predicts that it will become as popular for this purpose here as the Ivy is in England.
Extra strong 9.00 80.00
- HEDERA** (Ivy). The famous English Ivy with its familiar evergreen, glossy foliage is unfortunately not very hardy in this climate, and requires winter protection where it is exposed to chilly winds on open walls. It can, however, be planted with perfect safety as a ground cover or as an edging to flower beds.
- Helix** (English Ivy) 3.50 25.00
- LONICERA** (Honeysuckle). Their vining qualities are all that can be desired, but the fragrance of their flowers makes their strongest bid for favor.
- Halleana.** Color an intermingling of white and yellow. Extremely fragrant and most satisfactory 2.00 15.00
- POLYGONUM AUBERTI** (Silver Lace Vine). A splendid hardy climber of strong, vigorous growth, attaining height of 25 or more feet, producing during summer and fall great foamy sprays of white flowers, and a well established plant during its long period of flowering is a great mass of bloom. Not only does it thrive well in the Eastern and Middle States, but we have seen it in equally good condition in Oregon, Colorado, and California, adapting itself to the most varied climatic conditions 5.00 35.00
- PUERARIA** (Kudzu Vine). The most rapid growing vine in cultivation, often attaining a growth of 40 feet in a single season. Especially desirable for immediate effect for dense shade, as its leaves are large.
- Thunbergiana** (Jack-and-the-Bean-Stalk). Small pea-shaped, rosy-purple flowers, heart-shaped leaves. It will grow anywhere. Field-grown plants. 3.00 25.00
- WISTARIA** (Wisteria). Woody vines with tightly clinging habit, for pergolas, arbors, trellises, etc., especially ornamental in early summer when they are resplendent with their large, drooping clusters of fragrant blossoms.
- Sinensis** (Chinese Wistaria). Bunches of pale lilac, deliciously scented blossoms in great profusion all over the vine.
Strong plants 5.00 40.00
- alba.** A white-flowered form of the type.
Strong plants 5.00 40.00

CLEMATIS MONTANA

WISTERIA SINENSIS

A Novel Hardy Border

This suggestion, offered to our retail customers, may be used to advantage by wholesalers, the collections being furnished by us at 30% discount to the trade.

SCALE

A Spring, Summer and Autumn Garden, three distinct schemes, with choice of two colors for each—all can be planted at one time

On these pages is presented a very ingenious planting plan, designed by an eminent architect, for a 50-foot Herbaceous Border. Three distinct gardens are suggested, for Spring, Summer and Autumn bloom, while a choice of two color schemes is offered for each. One may therefore choose such a collection as will bloom at seasons when the owner will be at home to enjoy them, but positively do not break collections, as this would spoil the scheme.

Where two numbers are indicated for the same space, i. e., 15-15a, and 2 and 2a, the bulbs are planted beneath the plants. The letters preceding numbers, indicate: E, Early or Spring; M, Midseason or Summer; L, Late or Autumn.

SPRING GARDEN NO. 1

Flowers of Blue and Yellow Shades.

Key	Names	Quantity Required	Price
1	Tulip Yellow Perfection.	28	\$1.40
1a	Nepeta Mussini	24	5.00

(EACH 50 FEET BY 75 FEET)

Here are two planting schemes for the complete furnishing of an "autumn" and an "all season" garden. A glance at the designs, conveys instantly a desire to own such a garden, and a study of the lists of subjects incorporated therein, reflects the care and ability with

which these plans have been conceived. The benefits derived by those who use the designs on these and the two previous pages are two-fold: (1) The free advice of two of America's leading landscape designers, and (2) a liberal reduction in the cost of the stock.

SPRING and FALL GARDEN

ACONITUM. 20 Fisheri.....\$6.67	CHRYSANTHEMUM. 12 Hardy Pink.....2.50	LILIES. 20 Tigrinum Simplex... 4.60
ANEMONE. 10 Whirlwind..... 2.10	12 Hardy Yellow..... 3.50	20 Speciosum Album..... 8.40

Butterfly Weed	4	4	Geranium	18	Starwort	2	Sweet Rocket	22
C			Geum	18	Milfoil or Yarrow	16	Sweet William	14

ALL plants offered in this catalog are strong field-grown roots, especially grown to a size which will give the planter immediate results. There are a few instances where it is impossible to use other than pot grown plants in order to obtain the best results. In a case of that kind we send out either strong two-year or three-year-old pot plants. The prices charged for our stock are based on the above mentioned facts, and therefore should not be compared with prices quoted by firms who sell small one-year field grown or two-and-a-half or three-inch pot plants. Our plants are guaranteed true to name.

We will gladly furnish prospective customers with names of reputable nurserymen and landscape architects who have used our plants and bulbs for many years to their utmost satisfaction.
